# ARTICLE 1: STATUTORY AUTHORIZATION, FINDING OF FACT AND PURPOSE AND INTENT

### **SECTION A. TITLE**

This Order shall be known as the "Chambers County Subdivision Regulations." As a short title, these Regulations shall be known and may be cited as, the "Subdivision Regulations."

# SECTION B. PURPOSE AND INTENT

It is the purpose of these Subdivision Regulations to help promote, protect and improve the public health, safety, comfort, convenience, prosperity and general welfare of the citizens of Chambers County. Similarly, it is the intention of these Subdivision Regulations to SECURE:

- The establishment of standards of subdivision design which will encourage the development of sound and economically stable communities, and the creation of healthful living environments, including drainage, water treatment and distribution, and sewage treatment and disposal;
- 2. The efficient, adequate and economic supply of utilities and services to new land development;
- 3. The provision of safe and convenient traffic circulation, both vehicular and pedestrian, in new land development;
- 4. Accurate land records for the convenience and protection of the public and for adequate identification and permanent location for real estate boundaries and those structures erected pursuant to these Subdivision Regulations; and
- 5. Equitable handling of all subdivision plats by providing uniform procedures and standards applicable to both the subdivider and the County.

AND TO REDUCE: Hazards due to flooding; and Hazards due to inadequate traffic management and congestion.

# **SECTION C. AUTHORITY**

These Subdivision Regulations have been prepared and are adopted under authority of Chapter 232, Local Government Code

### SECTION D. JURISDICTION AND APPLICATION

The regulations established herein shall be applicable to all unincorporated areas of Chambers County, Texas, and shall be construed to be minimum requirements. They may also apply to any municipality in Chambers County that elects to use them.

Encompassed in this County are other entities which may have other regulations applicable to developing land which include, but are not limited to, cities located within Chambers County and drainage districts created by the Texas Legislature.

Chambers County recognizes extra-territorial jurisdictions (E.T.J.) for all incorporated areas of the County. Each city's E.T.J. boundaries are determined by the following chart.

Population	Distance
Less than 5,000	One Half (1/2) Miles
5,000 – 25,000	One (1) Mile
25,000 - 50,000	Two (2) Miles
50,000 - 100,000	Three and One-Half (3-1/2) Miles
100,000 - or More	Five (5) Miles

Many of the municipalities' E.T.J. are governed by the subdivision regulations of the individual municipality. It is the property owner and/or developer's responsibility to determine if the tract lies within a city's E.T.J. and to determine if that city enforces its authority for subdividing/platting within its E.T.J. These incorporated areas may insist that their road standards be used for construction, as long as they are more stringent than County requirements. However, such roads, if dedicated to the public, shall be ultimately maintained by the County and therefore the County shall review plans for those roads and their construction.

Within the jurisdiction of these Subdivision Regulations, except as hereinbefore and hereinafter provided, no subdivision shall be made, platted, or recorded, nor shall any building permit be issued, unless such subdivision meets all requirements of these Subdivision Regulations and has been approved in accordance with the requirements as hereinafter provided. Further, no subdivision street will be accepted for maintenance unless that street exists in a platted subdivision.

# **SECTION E. LEGAL STATUS**

# **Severability**

It is the intention of these Subdivision Regulations that the sections, paragraphs, sentences, clauses and phrases of these Subdivision Regulations are severable; and if any section, paragraph, sentence, clause or phrase of these Subdivision Regulations shall be declared void, ineffective or unconstitutional by a valid judgment or final decree of any court of competent jurisdiction, such unconstitutionality shall not affect any of the remaining sections, paragraphs, sentences, clauses or phrases hereof, since the same would have been enacted by this Court without the incorporation herein of any such unconstitutional section, paragraph, sentence, clause or phrase.

# **Effective Date**

These Subdivision Regulations and any provisions herein contained shall supersede all previous applicable resolutions and policies and shall take effect and be enforced from and after their adoption by the Court, by proper resolution.

# **ARTICLE 2: DEFINITION OF TERMS**

Except where specific definitions are used within a specific article or section of these. Subdivision Regulations for the purpose of such sections, the following terms, phrases, words and their derivation shall have the meaning given herein when not inconsistent with the context. Words used in the present tense include the future, words in the plural number include the singular number and words in the singular number include the plural number. The words "used for" shall include the meaning "designed for." These definitions may be regulatory on their face. The words "shall" and "will" are mandatory and the word "may" is permissive. Definitions not expressly authorized herein are to be considered in accordance with customary usage in engineering practices.

**ALLEYS** – A road or street provided to serve as a secondary access to a business, commercial, industrial, and/or residential areas, for the purpose of service access, off-street loading, unloading and/or parking consistent with and adequate for the uses permissible on the property.

**APPLICATION** – A submittal that includes a completed Plat Application form along with all required attachments which may be required as part of that submittal and the appropriate review fee. These attachments may include, but are not limited to, drawings, drainage or geotechnical reports or electronic data files.

BFE (BASE FLOOD ELEVATION) – The elevation shown on the Flood Insurance Rate Map (FIRM) and found in the accompanying Flood Insurance Study (FIS) for Zones A, AE, AH, A1-A30, AR, V1-V30, VE, or SHADED X for 500 Year, that indicates that the water surface elevation resulting from the flood that has a 1% (100 Year) or 0.2% (500 Year) chance of being equaled or exceeded in any given year – also called the Base Flood. New residential development shall be constructed so that the top of slab is 1 Ft above the 500 Year BFE.

**BENCHMARK** - A land surveyor's mark made on a stationary object of previously determined position and elevation and used as a reference point in tidal observations and surveys.

**BLOCK** - A tract of land bounded by streets, or by a combination of streets and public parks, cemeteries, railroad right-of-ways, shorelines of waterways, and any other definite barrier or boundary of a city, town or village.

**BUILDING** - Any structure designed or built for the support, enclosure, shelter, or protection of persons or property.

**BUILDING LINE/SETBACK LINE** - A line established, in general, parallel to the property line. No building or structure may be permitted in the area between the building line and the street right-of-way.

**CERTIFICATE OF OWNERSHIP** - Either (1) an opinion of an attorney at law based upon

an examination of an abstract or title, showing that the person submitting a plat for approval is the owner(s) of the real estate included in said proposed plat; or (2) the certificate of an abstract company or title insurance company licensed to do business in the State of Texas, certifying that the property owner and/or developer submitting a plat for approval, is the owner or the legal representative of the owner of the tract included in said proposed plat. Such opinion of attorney or certificate of an abstract or title insurance company shall show the names of all persons or entities holding recorded liens on said real estate.

**CLERK** - The County Clerk of Chambers County.

**COMPREHENSIVE PLAN** - The plans, or parts thereof, prepared and adopted by the Court for guiding the County's future physical development in regard to transportation, public facilities, utilities and other physical needs. This includes, but is not limited to, the Thoroughfare Plan, Mobility Plan, Drainage Criteria Manual, and any other regulation, ordinance, plan, study, code, and/or order approved/accepted and added to the comprehensive plan added by the Commissioners' Court.

**COMMERCIAL DEVELOPMENT -** all types of business development including industrial, commercial and retail projects. Shall include a visual screen and sound buffer when adjacent to residential development or roadways adjacent to residential development.

**CONDOMINIUM DEVELOPMENT** - A form of real property with portions of the real property designated for separate ownership or occupancy, and the remainder of the real property designated for common ownership or occupancy solely by the owners of those portions. For the purposes of these Regulations, Condominiums shall include all developments created under Chapter 82 of the Texas Property Code, also known as the Uniform Condominium Act.

**COUNTY** - Land area within the jurisdictional boundaries of Chambers County not in a municipality; or, Chambers County, the governmental entity established pursuant to Texas Local Government Code § 71.001.

**COUNTY ENGINEER** - The County Engineer of Chambers County or his duly authorized representative. The County Engineer may issue certificates as required by these rules subject to general policies of the Commissioners Court or to specific orders of the Court.

**COURT** - The Commissioners Court of Chambers County, Texas.

**CUL-DE-SAC STREETS** - Local streets having only one (1) open end providing access to another street; the closed end provides a turnaround circle for vehicles.

**DEAD END STREET** - A road that has no outlet, without a cul-de-sac.

**DEVELOPER (SUBDIVIDER)** - A property owner or authorized agent proposing to divide

land so as to constitute a subdivision according to the terms and provisions of the subdivision rules.

**DRC (DEVELOPMENT REVIEW COMMITTEE)** - Required meeting with County officials to review the Preliminary Plan, layouts and sketches. This meeting is required for all new subdivisions or developments.

**DEVELOPMENT CONTROLS** - These Subdivision Regulations, Building Permit Regulations, Fire Code, On-Site Sewage Facility Permitting, Drainage Criteria Regulations, and Manufactured Home Ordinance, etc., and any other ordinances/regulations adopted or used by Chambers County with respect to development.

**DWELLING** - A building or portion thereof designed or used primarily for residential occupancy.

**EASEMENT** - Right given by the owner of a parcel of land to another person, the general public, a public agency, or private corporation for the specific and limited use of that parcel. It usually constitutes a privilege or right-of-use or enjoyment granted on, above, under, or across a particular tract of land by one owner to another.

**ENGINEER** - A qualified person registered and currently licensed to practice civil engineering in the State of Texas.

**ENVIRONMENTAL DEPARTMENT** - The Chambers County Environmental Health Department.

**ETJ (EXTRATERRITORIAL JURISDICTION)** - The unincorporated territory extending beyond the city limits of a city as set forth by Chapter 42.021, Local Government Code. The unincorporated area which is contiguous to the corporate boundaries of the municipality.

**FEMA** - The Federal Emergency Management Administration.

**FIRE HYDRANTS** - Fire hydrants shall color coded according to the flow available at the hydrant, subject to approval by the County Fire Marshal:

Table 3

Light Blue	1500 gpm or greater
Green	1000 to 1499 gpm
Orange	500 to 999 gpm
Red	Less than 500 gpm

Blue pavement reflectors shall be installed by the developer on roadways and streets near the center strip of the roadway, on the side of the stripe which the hydrant is located.

**FLOOD PLAIN ADMINISTRATOR** - Enforces the building regulations established pursuant to the Federal Emergency Management Administration regulations and the Texas Water Code for the benefit of Chambers County.

**FOUNDATION** - Lowest level of a residence whether it is a masonry slab, or a pier and beam structure, that is partly or wholly below the surface of the ground and on which the residential structure rests or will rest.

**FRONTAGE** - The length of the property lines of lots, or tracts of land abutting a public street, road, highway or undeveloped right-of-way.

**GRADE** - The slope or inclination of a feature with respect to the horizontal, generally expressed by stating vertical rise or fall as a percentage of the horizontal distance. This term is generally used in these Subdivision Regulations to describe the slope of planes, ridges, and inverts found on roads, ditches, ponds, and unimproved land.

**GREEN SPACE** - Green Space Requirements Authority for these regulations is given in V.T.C.A., Local Government Code §232.101. Subchapter E (SB873). A. Subdivision plats that are filed in Chambers County shall contain a community green space dedication at a ratio of ¼ acre of green space for every 100 lots. Green space areas must be no smaller in size than 1/4 acre and must be at least 20 feet in width in order to provide access and sufficient useable area. 1. Landscape setbacks and ditch right-of-ways along roadways, will not be considered green space unless they are wider than required by County regulations. 2. Pipeline easements will be accepted as green space if they contain an improved walking trail as defined above. 3. Detention easements, excluding the actual detention pond area, will be accepted as green space if they contain an improved walking trail as defined above. B. Subdivision plats that contain less than 100 lots shall dedicate a minimum of 1/4 acre of green space. C. Plats that have single family residential lots 1 acre in size or larger are exempt from the green space requirement. D. In projects that have multiple sections of lots, the green space requirement may be set outside the plat boundaries provided that the multiple plats previously recorded meet the dedication requirements and definition. 1. Access to green space areas outside the boundaries of the plat must not have an at-grade crossing of a major thoroughfare in order to receive credit. 2. Access to green space areas outside the boundaries of the plat shall be located within a maximum \( \frac{1}{4} \) mile radius of all residences within the subdivision plat.

Any public or private land that would serve as an area to provide relaxation or recreation to all residents within a specific subdivision. Green space may be used for active or passive activities. It may be an open field, and may or may not have improvements such as benches, shade structures, playground equipment, or trails located within the

boundaries of the property. In the case of commercial/industrial subdivisions, green space shall include green space buffers for both sight and sound walls when adjacent to residential areas or roads in which residential development exists.

Maintenance and Ownership For the purposes of upkeep, permanent maintenance and ownership responsibilities of dedicated green space shall be conveyed to either an existing or newly formed property owners or other approved entity established for the subdivision, and must be identified upon the recording of the final plat.

**HAMMERHEAD ROAD** - Local streets having only one (1) open end providing access to another street; the closed end being a "T"-shaped turnaround adequate for vehicular turn around.

**ILLUMINATION** - Required for all subdivisions with maximum spacing of luminaires is 200 FT apart.

**IMPROVEMENTS** - May include, but are not limited to, street pavement, curbs and gutters, sidewalks, alley pavements, walkway pavements, water mains, water systems, sanitary sewers, storm sewers or drains, or facilities that efficiently manage the flow of storm water runoff in the subdivision and coordinate subdivision drainage with the general storm drainage pattern for the area, street name signs, landscaping, permanent reference monuments (P.R.M.'s), permanent control points (P.C.P.'s), or any other improvement required by the Court.

**JOINT USE AGREEMENT** - A letter from the utility company stating that they have no objection to the proposed road crossing their easement. If the utility company operates a pipeline within the easement, the letter shall further state that the pipeline either meets the requirements in Article 7, Section I – Pipeline Crossing -- or has been adjusted to meet these requirements.

**LAND SURVEYOR -** A surveyor registered under Chapter 1071, Texas Occupation Code, who is in good standing with the Texas State Board of Professional Land Surveying.

**LOT** - A portion of a surface of land contained within property lines of a specific area, including land within easements and building setback lines of said area, but excluding any land within a street right-of-way. The word "lot" includes the words "plot," "parcel" or "tract."

<u>Corner Lot</u> - A lot abutting upon two (2) or more streets at a street intersection, or abutting upon two (2) adjoining and deflected lines of the same street.

<u>Double Frontage Lot</u> - A lot having two (2) or more of its non-adjoining property lines abutting upon a street or streets.

**LOT DEPTH** - The average horizontal distance between the front and rear property lines of a lot.

**LOT WIDTH** - The distance, measured along the building setback lines, between the two (2) side property lines of a lot.

**MANUFACTURED HOME RENTAL COMMUNITY** - A plot or tract of land that is separated into two or more spaces or lots that are rented, leased, or offered for rent or lease, for a term of less than 60 months without a purchase option, for the installation of manufactured homes for use and occupancy as residences. These communities shall conform to subdivision requirements.

**MUNICIPALITY** - Any incorporated city or town.

**MUTCD** - The Texas Manual of Uniform Traffic Control Devices.

**OSSF (ON SITE SEWAGE FACILITY)** - Must meet all requirements found in 30 Texas Administrative Code (TAC) 285.4(C).

**PERMANENT CONTROL POINT** - Which shall be a secondary horizontal control monument and shall be a I/2-inch iron rod (24 inches long) set flush on centerline of pavement (if flexible base) or "x" mark (concrete pavement).

# **PLAN**

<u>Preliminary Plan</u> - The first official submission of a subdivision scheme to the County Engineer which consists of an application and drawing showing general lot and street layout and other pertinent features of a proposed subdivision for the purpose of discussion prior to the formal subdivision platting process. Normally reviewed at the County Development Review Committee (DRC) meeting which is the first step in the subdivision process.

<u>Sketch</u> - An informal drawing prepared by the property owner and/or developer or authorized agent requesting a variance indicating the general lot and street layout, and pertinent features of a proposed subdivision highlighting the variance being requested for the purpose of discussion prior to the formal variance application.

<u>PLAT</u> - A map or drawing of a proposed subdivision prepared in a manner suitable for recording in the Clerk's records and containing accurate and detailed engineering data, dimensions, and dedicatory statements and certificates.

<u>Preliminary Plat</u> – Preliminary map or drawing of a proposed subdivision with sufficient detail to fully describe or convey the full intent of the proposed subdivision including, but not limited to, thoroughfares, local and interior streets.

<u>Final Plat</u> – The final map or drawing completed to the specifications of this Ordinance with all necessary dedications, approvals, and requirements for recording with the Clerk's Office as an official document. Final plats will be approved by commissioner's court prior to selling of lots.

**PRIVATE ROAD / ON PUBLIC ROW** - Publicly accessible private road constructed and maintained by others; NOT by the County.

**PRM (PERMANENT REFERENCE MONUMENT)** - Such monument can be (1) a one-half inch iron rod at least 24 inches long; **or** (2) a 1½ inch diameter metal pipe at least 24 inches long. The monument shall be encased in concrete. The concrete shall be a minimum of 6 inches in diameter and extending at least 18 inches below the top of the monument. A metal cap marker with the reference marked thereon shall bear the registration of the land surveyor certifying the plat of record and the letters PRM shall be placed in the top of the monument.

**PROPERTY OWNER** - An individual, partnership, corporation, or other legal entity recognized by Texas law, or agent thereof, which undertakes the activities covered by these Subdivision Regulations. The term "property owner and/or developer" includes "subdivider," "owner," "builder," etc., even though the person and their precise interests may vary at different project stages.

**ROW (RIGHT OF WAY)** - A dedication of land to be used generally for streets, alleys, drainage, canals, lakes, or other public uses, wherein the owner gives up his rights to the property.

**ROAD/STREET** - The terms "street" or "road" are interchangeable and mean a vehicular way, including culverts and bridges, and are used to describe all vehicular ways regardless of any other designation they may carry. All roads shall be categorized into one of the following functional classifications:

**ARTERIAL ROAD** - Arterial roads are those that are principally regional in nature and are used for through or high volume traffic and shall be divided into the following three sub-classifications:

- a. Roads which will serve vehicular traffic beyond the limits of the subdivision; and/or connect one collector or arterial with one or more collectors or arterials.
- b. Roads which are existing county roads, are at least one mile in length, and carry a numerical designation.
- c. Roads included as an arterial on a county or city transportation plan.

**COLLECTOR ROAD** - Collector roads are those which connect arterial roads with local roads.

**LOCAL ROAD** - Local roads are those which principally provide direct access to lots within a subdivision. All roads shall also be classified as follows:

**CURB & GUTTER/URBAN ROAD** - For the purposes of this ordinance, an urban road is any road situated such that the average spacing of driveways is less than 100 feet when measured over a distance of one- quarter (1/4) mile. Any road with concrete curb and gutter will be considered an urban road. All subdivisions with curb and gutter streets shall have a minimum 4 FT sidewalk on each side of roadway and have curb ramps meeting ADA accessibility requirements.

**OPEN DITCH /RURAL ROAD** - For the purposes of this ordinance, a rural road is any road situated such that the average spacing of driveways is 100 feet or more when measured over a distance of one-quarter (1/4) mile.

**SEWAGE SYSTEM** - A system for collection, treatment and disposal of sewage, whether said system is a wastewater treatment plant permitted by the TCEQ (Texas Commission on Environmental Quality) or an OSSF (on-site sewage facility) permitted by the Chambers County Environmental Health Department or the TCEQ.

**SIDEWALK** - Required for all subdivisions that have curb and gutters. A minimum of 48 inch wide reinforced concrete path that meets the slope requirements of the Texas Accessibility Standards along with required ramps. Sidewalks are not maintained by the County.

**SMALL SUBDIVISION (MINOR PLAT)** - A parcel of land divided into four (4) or fewer parts and meeting the requirements set out in Article 4, Section D.

**SUBDIVIDER** - See "property owner" and "developer" in these definitions.

**SUBDIVISION** - The division of any tract of land, situated outside the corporate limits of any city located in Chambers County, Texas, into two (2) or more parts, for the purpose of laying out a subdivision of any tract of land, including an addition, creation of lots, or the laying out of streets, alleys, squares, or parks, or other portions intended for public use or for the use of purchasers or owners of lots fronting on or adjacent to the streets, alleys, squares, parks or other parts.

**TCEQ** - Texas Commission on Environmental Quality

**TIA (Traffic Impact Analysis)** - Provides information on the projected traffic expected from a proposed development. A neighborhood TIA is limited to an evaluation of existing and projected operating levels of residential streets and an identification of mitigation measures needed to minimize traffic impacts. Note that a TIA can be required for any developments along State Highways, Thoroughfares or County Roads.

**THOROUGHFARE** - A minor or major arterial that is on the Chambers County Thoroughfare Plan, which may presently exist or is to be built in the future.

**THOROUGHFARE PLAN** - The most recent Chambers County Thoroughfare Plan adopted by the Commissioners Court.

TRACT - A specified parcel of land.

**TxDOT** - The Texas Department of Transportation.

**TxDOT STANDARD SPECIFICATIONS** - Current version of Standard Specifications for Construction and Maintenance of Highways, Streets, and Bridges.

TMUTCD - The latest edition of the Texas Manual on Uniform Traffic Control Devices.

**UTILITY** - an entity as defined herein, engaged in this State in the:

- 1. Production, generation, transmission, distribution, sales, or furnishing of electric power;
- 2. Transportation, conveyance, distribution, sales through a local distribution system of natural or other gas for domestic, commercial, industrial, or other use;
- 3. Ownership, management, operation, leasing or controlling of a pipeline for the transmission, conveyance, distribution, delivery, or sale of natural or other gas, natural gas liquids, crude oil or petroleum products to other pipeline companies, refineries, local distribution systems, municipalities, or industrial consumers;
- Conveyance, transmission, or receiving communications over a telephone system and providing telephone or telegraph service to others including fiber optic, cable, or any other telecommunication technology implemented;
- 5. Production, transmission, distribution, or sale of steam or water;
- 6. Operation of a railroad; and/or
- 7. The provision of sewer service to others.

**VARIANCE** – Is a grant of relief to a person from the requirements of these Subdivision Regulations when specific enforcement would result in unnecessary hardship. A variance permits construction or development in a manner otherwise prohibited by these Subdivision Regulations. Any variance request shall be submitted to the County engineer for approval. If approved, then a recommendation will be submitted to Commissioner's Court.

**WALKING TRAIL** – An improved 6 feet-wide minimum path, consisting of a material conducive to walking, running, strolling, or cycling. Crushed granite, concrete, and asphalt are considered appropriate surface materials for walking trails. Walking trails should be incorporated as part of the maintenance berm around all residential drainage ponds.

**WATER SYSTEM** – A system for the supply of potable water, whether said system is publicly- owned, community-owned, or privately-owned

# ARTICLE 3: CIRCUMSTANCES REQUIRING PLATTING AND APPROVAL

### SECTION A. PLATTING REQUIRED

Authority for these Regulations is given in VTCA, Local Government Code § 232.001.

A property owner and/or developer is required to abide by these Subdivision Regulations and the Local Government Code, Chapter 232 and prepare and file a plat when the following occurs:

The property owner and/or developer owns a tract of land located outside the limits of a municipality; and

Divides the tract into two (2) or more parts to layout:

- a. A subdivision, including an addition, or
- b. lots; or
- c. streets, alleys, squares, parks, or other parts of the tract intended to be dedicated to public use or for the use of purchasers or owners of lots fronting on or adjacent to the streets, alleys, squares, parks, or other parts.

A division of a tract includes a division made by using a metes-and-bounds description in a deed of conveyance or in a contract for deed, by using a contract of sale or other executory contract to convey the property, or by using any other method which divides the tract into two (2) or more parcels.

# **SECTION B. COUNTY APPROVAL REQUIRED**

Authority for these Regulations is given in V.T.C.A., Local Government Code § 232.002.

### Approval

The Court must approve, by an order entered in the minutes of the Court, a plat as required under Article 4 of these Subdivision Regulations.

# **Disapproval**

The Court may refuse to approve a plat if:

- 1. It does not meet the requirements prescribed by these Subdivision Regulations or the Texas Local Government Code, Chapter 232; or
- 2. If any bond required by these Subdivision Regulations or the Texas Local Government Code, Chapter 232, is not filed with the County.

# **ARTICLE 4: PROCEDURE FOR SUBDIVIDING LAND**

The purpose of this section is to establish a systematic procedure in preparing, reviewing and approving subdivision plans and plats.

**Transmittal Letters** – All submissions made to the County Engineer's Office must be accompanied by a transmittal letter giving the purpose of the submission such as: for information only, preliminary or final review, the name and location of the project, and the controlling jurisdiction such as city, ETJ, or County. A listing of all enclosed documents and drawings must be included.

# **SECTION A. PRE-APPLICATION PROCEDURE**

Before any preliminary work is prepared, the property owner and/or developer of any land within the County should become familiar with the various provisions and requirements of subdivision requirements. This should help avoid heavy expenditures of time, effort, and money, only to find that costly changes are required by the County Engineer to make the plans conform to these requirements. The Chambers County Drainage Criteria Manual also applies to the design and construction of subdivisions.

Plans shall be submitted online to the County Engineer before the tract is subdivided establishing more than one (1) lot, any street, alley, easement or public right-of-ways or before any building, street, drainage, or utility construction is begun. A mandatory county DRC will be scheduled as a first step.

## <u>Considerations</u>

<u>For Commercial / Industrial Developments-</u> All types of business development including industrial, commercial and retail projects. Shall include a visual screen and sound buffer when adjacent to residential development or roadways adjacent to residential development.

<u>All Development</u> -The enforcement of plat restrictions is the responsibility of the developer and other owners in the subdivision; however, in an Extraterritorial Jurisdiction both the city and the Commissioners Court of Chambers County shall have the right and authority to enforce plat restrictions through appropriate legal procedure to prohibit the construction or connection of utilities, or issuing of permits unless or until the requirements of the plat restrictions have been achieved.

The County will assume no responsibility for drainage ways or easements in the subdivision, other than those running on or along the streets and roads. Maintenance and liability of landscaped areas, sidewalks, illumination, utilities and other improvements within the right-of-way will be the responsibility of the developer, the municipal utility district, neighborhood association, or other legal entity.

The County Engineer shall inspect and approve any partial completion of infrastructure to be dedicated and recommend approval to the Commissioner's Court. Until approval of final plat is made and approved by Commissioner's Court, no conveyances of any property shall be made.

NOTES ARE REQUIRED ON THE PLAT REQUIRING DRAINAGE AND OTHER IMPROVEMENTS OUTSIDE OF COUNTY ROAD RIGHT OF WAY TO BE MAINTAINED BY SUBDIVISION HOA, THE SUBDIVISION OWNER AND OR DEVELOPER.

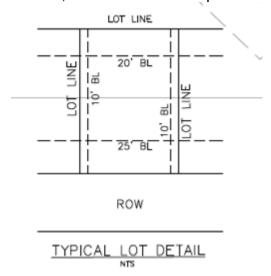

No lots or conveyance of any property within the area of an unrecorded plat may be made until the improvements necessary to ensure access, utilities and drainage have been completed to a point that the land or lots to be conveyed have full public services available directly to such property.

The final plat shall contain a statement dedicates all drainage paths to a public agency, and or HOA for maintenance.

Subdivision Developer/ Owner shall dedicate forever to the public a strip of land \_\_\_ feet wide on each side of any and all gullies, ravines, draws; sloughs, rivers, or other natural drainage conveyances located in or adjacent to said subdivision as easements for drainage purposes, giving the County or any public agency the right to enter upon said easement at any and all times for any public purpose.

Subdivision Developer/ Owner shall relinquish all rights of access to major streets or thoroughfares shown hereon except by way of the platted streets shown.

All drainage reserves and easements shall be kept clear of fences, buildings, tree, shrubs, and other obstructions to the operations and maintenance of the drainage facility and abutting property shall not be permitted to drain to the easement except by means of an approved drainage structure. All reserves and easements shall be maintained by the Home Owners Association, Subdivision Developer/ Owner.

# SECTION B. ACCEPTANCE OF COUNTY ROADS FOR MAINTENANCE

Once the Subdividers have completed all subdivision improvements, have reimbursed the county for any outstanding fees, and the engineer's certification stating that the improvements including streets, drainage and utilities were made in accordance with the approved improvement plans and County regulations; or as-built drawings containing an engineer's certification stating that the changed improvements are in accordance with the County's regulations, the Plat will be released for recordation. Plats can be recorded earlier with required bond and meeting other requirements as specified in plat section.

By accepting a subdivision plat for filing, the Commissioners Court does not thereby accept the streets and roadside drainage in the subdivision for ownership or maintenance by the County. The owner or owners of the platted lots are responsible for maintenance of all streets or roads within the subdivision until such time as the construction of the roads have been constructed to meet standards and accepted by the County. The County will accept the roads and roadside drainage within the subdivision ONLY after receiving a request to do so from the property owner and/or developer and meeting the requirements below:

The request will include one of the two options below:

- 1. The Subdivision accepted into County maintenance after fifty percent (50%) of the subdivision has been built out AND two years have elapsed from the date of the Plat being accepted by Commissioners Court, unless failure of workmanship or material has occurred. If fifty percent (50%) of the subdivision has not been built out within two years from the date, the subdivider will have the option to extend the period in one year increments until fifty percent (50%) build out of homes in the subdivision has occurred. After the two years, 50% build out of homes, and a request to take over the subdivision, the County Engineer will inspect the subdivision improvements and provide a written punch list to the owner/developer for repair. If repairs take more than three months, a new punch list will be required. Once all items are completed and approved, then the County Engineer shall make recommendation to the Commissioners Court to accept the roads for County maintenance.
- 2. As an option, the County can accept the roads for acceptance immediately with a 50% warranty bond between the property owner and/or developer and the County. The bond will be held for a specified warranty period of which must be at least 2 years in length and until 50% of homes are completed. If at the end of the 2 years, 50% of homes are not completed, then the warranty period will be extended in 1 year increments until 50% of homes are completed. At the end of the warranty period, the property owner and/or developer will request final acceptance. An inspection will be performed. If the condition of the improvements still meets the County's requirements, the County Engineer will request the Court to accept the roads. Any repairs made during the warranty period will be pulled from the bond. Once acceptance has passed through the Court, the remaining warranty bond will be returned to the property owner and/or developer.

### **SECTION C. SUBDIVISIONS WITHIN ETJ**

These procedures are the County's requirements. The property owner and/or developer must also comply with the requirements of the appropriate city ETJ and drainage district. Property owner and/or developer must determine those requirements.

# Preliminary Plan Submittal

The purpose is to review compliance with the Thoroughfare Plan, Drainage Criteria Manual, Infrastructure Manual, and other local concerns.

Developer and/or property owner must deliver to the County Engineer's Office the following Digital submissions and:

- 1. A transmittal letter requesting approval; and
- 2. Two (2) paper copies of the preliminary plan.
- 3. The County Engineer's Office will respond via email unless otherwise requested.
- 4. An optional pre-planning meeting will be available to discuss the requirements and/or plan, if determined to be necessary.

# **Preliminary Plat Submittal**

The purpose is to review compliance with the Subdivision Regulations, FEMA Building Regulations, 911 Regulations, and Environmental Health Regulations.

Developer and/or property owner must deliver to the County Engineer's Office the following Digital submissions and:

- 2. A transmittal letter requesting approval; and
- 3. Three (3) paper copies of the preliminary plat for the County Engineer, Flood Plain Administrator and Environmental Department.
- 4. The County Engineer's Office will respond by email unless expressed otherwise requested.

# Construction/Improvement Plans, Studies, and Material

The purpose is to review compliance with the Subdivision Regulations.

Property owner and/or developer must deliver to the County Engineer's Office the following Digital submissions and:

1. A transmittal letter requesting approval of County Engineer's Office; and

2. Two (2) paper copies of all materials to be reviewed and approved.

# Final Plat Submittal

The purpose is to confirm compliance with the Subdivision Regulations, FEMA Building Regulations, 911 Regulations, and Environmental Health Regulations.

Property owner and/or developer must deliver to the County Engineer's Office the following:

- 1. A letter requesting approval;
- 2. Three (3) paper copies of the final plat for the County Engineer, Flood Plain Administrator and Environmental Department;
- 3. Final set of the approved construction/improvement plans; and
- 4. Electronic submittal of all documentation. The Chambers County Electronic Submittal Policy is attached hereto as Appendix K.
- 5. The County Engineer's Office will respond via letter expressing approval and/or comments needing to be addressed.

After the appropriate city has approved the final plat and released it to the property owner and/or developer, the property owner and/or developer SHALL file the final approved plat with the Clerk and submit a mylar copy to the County Engineer.

# **SECTION D. SUBDIVISIONS NOT WITHIN ETJ**

These procedures are the County's requirements. The property owner and/or developer must consult with the appropriate drainage district to determine its policies, procedures and requirements. If the tract of land is not within a drainage district, then the County will assume the responsibilities of the drainage district with regard to this review process. Any actual costs incurred by the County in regards to these additional responsibilities will be assessed to the property owner and/or developer.

# **Preliminary Plan Submittal**

The purpose is to review compliance with the Thoroughfare Plan, Subdivision Regulations, and if not in a drainage district – the Chambers County Drainage Criteria Manual and any other local concerns.

Property owner and/or developer must deliver to the County Engineer's Office the following Digital submissions and:

1. A transmittal letter requesting review of the preliminary plan; and

- 2. Two (2) paper copies of the preliminary plans.
- 3. The County Engineer's Office will respond by email unless expressed otherwise requested
- 4. An optional pre-planning meeting will be available to discuss requirements and/or the plan, if determined to be necessary.

# **Preliminary Plat Submittal**

The purpose is to review compliance with the Subdivision Regulations, FEMA Building Regulations, 911 Regulations, Fire Marshal, Environmental Health Regulations, and if not in a drainage district – Chambers County Drainage Criteria Manual.

Property owner and/or developer must deliver to the County Engineer's Office the following Digital submissions and:

- 1. A transmittal letter requesting review of the preliminary plat;
- 2. Three (3) paper copies of the preliminary plat for the County Engineer, Flood Plain Administrator, Fire Marshal and Environmental Department; and
- 3. A fourth copy is required if not within a drainage district.

The County Engineer will provide an email written response to the preliminary plat submittal notifying property owner and/or developer of any missing documents and provide comments or concerns needing to be addressed or answered.

# Construction Plans, Studies, and Material

The purpose is to review compliance with the Subdivision Regulations and, if not in a drainage district – the Chambers County Drainage Criteria Manual. If not within a drainage district, the drainage plan may be reviewed by a consulting engineering firm for the County Engineer. The fee for this review will be charged to the property owner and/or developer. The Construction Plans shall include all specifications, drawings and details needed for bidding and construction of the subdivision.

Property owner and/or developer must deliver to the County Engineer's Office the following Digital submissions and:

- 1. A transmittal letter requesting approval;
- 2. Two (2) paper copies of the preliminary plat; and
- 3. A third copy of all drainage related materials, if not in a drainage district.

# Final Plat Submittal

The purpose is to confirm compliance with the Subdivision Regulations, F.E.M.A. Building Regulations, 911 Regulations, Fire Marshal, Environmental Health Regulations, and if not in a drainage district – the Chambers County Drainage Manual, and obtain approval from the County Attorney.

Property owner and/or developer must deliver to the County Engineer's Office the following Digital submissions and:

- 1. Application for Plat Approval;
- Final Plat Four (4) paper copies for the County Engineer, Flood Plain Administrator, Environmental Department, and Fire Marshal. A fifth copy is required if not within a drainage district;
- 3. Final Design Plans Two (2) copies of the final improvement design plans;
- 4. Final Drainage Study;
- 5. TIA and any required approval from TXDOT if along a State Highway
- 6. Joint Use Agreement, if applicable;
- 7. Certificate of Ownership;
- 8. Letter from the Texas Department of Transportation If the proposed subdivision is along a state right-of-way, then an approval letter from the State in reference to access onto the state right-of-way as well as right-of-way requirements will be necessary; and
- 9. Electronic Submittal of all Documentation The Chambers County Electronic Submittal Policy is attached hereto as Appendix K.

**The County's Response** - If the plat does not meet all requirements, the County Engineer's Office will send a letter within 10 business days notifying applicant of any missing documents and provide comments or concerns needing to be addressed/answered. The Court will take final action on the plat application within 30 days of the County Engineer receiving a completed final plat application, unless the County sends notice within the 30 days of any issues with the application and or submittal.

If all of the requirements of these Subdivision Regulations have been met, the property owner and/or developer shall supply the County Engineer with two (2) mylar copies of the final plat and the County Engineer will recommend approval of the Court.

If the Court approves the plat, development may begin, however the County Engineer will withhold the two (2) signed copies until all improvements are completed in accordance

with the improvement plans. If within three (3) years, no improvements have been made and no request for an extension has been made by the property owner and/or developer and approved by the County Engineer, the County Engineer may request the Court to abandon the plat and cancel the subdivision pursuant to Texas Local Government Code § 232.008.

# Completion of Improvements

Before construction of improvements begins, a preconstruction meeting shall be held that includes the County Engineer and the County Engineering Consultant overseeing inspection. The County's Engineering Inspector or Consultant shall oversee all construction of roads and drainage to ensure they are completed to the satisfaction of the County. Once construction is complete to satisfaction of the County Engineer, the property owner and/or developer's engineer shall request that the final plat be released for recordation.

If an owner or developer desires to file the Plat prior to roads and drainage improvements being completed, then the owner or developer shall provide a bond of 115% cost of all remaining roads, drainage elements and other improvements to be constructed.

The request must contain:

- 1. A letter requesting the release;
- 2. If the optional warranty period is desired, a 50% warranty bond must be provided to the County. The bond will be held for a specified warranty period which must be at least 2 years and until 50% of the homes are complete;
- 3. The property owner and/or developer's engineer's certification certifying that the improvements were made in accordance with the approved improvement plans and County regulations or as-built drawings and an engineer's certification certifying that the changed improvements were made in accordance with the County's regulations. Any major deviations from the plan of improvement shall be approved by the County;
- 4. A letter signed and sealed by the engineer certifying that the elevations and grades were taken by an on-site survey on a certain date that all pavement, inlets, manholes and appurtenances are constructed to grade as shown on the record drawings, and in compliance with the approved plans and specifications. The letter shall also certify that all trunk storm sewers and leads are of the proper size and that all improvements are capable of performance as designed and approved. Any deviations from the approved construction drawings to actual construction shall be noted for evaluation by the County Engineer;
- 5. If the subdivision is in a drainage district, then a letter from the drainage district stating that the drainage facilities are constructed in accordance with the approved plans and the specifications are acceptable; and

# **Electronic Submittals**

The County Engineer may require that plats and improvement plans be submitted electronically.

# **SECTION E. SMALL SUBDIVISIONS (MINOR PLAT)**

The County Engineer will recommend that the Court approve a small subdivision if:

- The property owner and/or developer does not lay out streets, alleys, squares, parks, or other parts of the tract intended to be dedicated to public use or for the use of purchasers or owners of lots fronting on or adjacent to the street, alley, square, park, or other parts;
- 2. No more than four (4) parts result from the subdivision of a tract of land and each part is at least one (1) net acre in area; (i.e. easements do not count as part of tract)
- 3. The original parcel to be divided cannot be the result of a division using the small subdivision process within five (5) years from the date of application;
- 4. Each part has adequate, separate (not shared) access to a publicly-maintained road, with at least 60 feet of frontage along such road;
- 5. The proposed division is not expected to have adverse impact on drainage as confirmed in writing by the drainage district in which it is located (or by the County Engineer if not located in a drainage district);
- 6. Each part is suitable size and condition to allow the provision of adequate water systems and sewer service facilities, as confirmed in writing by the Environmental Department;
- 7. The owner submits an "Application for Variance from Platting Requirements" in the format prepared by the County Engineer's Office, along with the required information and documents;
- 8. The property owner and/or developer provides adequate right-of-way or easements for existing and proposed road and drainage facilities, if such are required by the County Engineer or the relevant drainage district. The property owner and/or developer additionally shall provide proof that all parties holding an interest in the tract have consented to such right- of-ways or easements; and
- 9. Property owner and/or developer shall provide necessary right-of-way dedications and setbacks.

#### **Procedure**

1. The property owner and/or developer shall meet with the County Engineer as part of a mandatory DRC meeting. Property owner and/or developer shall provide to the County Engineer a sketch of what is proposed and a copy of the deed of the tract

being divided.

- 2. If the proposed division meets the County's requirements, the property owner and/or developer will then be responsible for getting a letter from the Environmental Department, the appropriate drainage district (or the County Engineer if not within a drainage district), and a tax certificate showing that all taxes are paid on the tract. The property owner and/or developer will also be responsible for obtaining a "plat of survey" from a land surveyor containing a legal description of all tracts created.
- 3. Once these items are delivered to the County Engineer's Office, the proposed subdivision will be brought before the Court.
- 4. Upon approval of the Court, the County Engineer will supply the property owner and/or developer with a letter granting approval with the original court order attached, which shall be filed along with the plat of survey signed and sealed by the land surveyor.

## **SECTION F. EXCEPTIONS TO PLAT REQUIREMENTS**

Authority for these Regulations is given in V.T.C.A., Local Government Code § 232.0015.

No property owner and/or developer will be required to have a plat of the subdivision if the property owner and/or developer does not lay out a part of the tract by laying out streets, alleys, squares, parks or other parts of the tract intended to be dedicated to public use or for the use of purchasers or owners of lots fronting on or adjacent to the streets, alleys, squares, parks or other parts and meets one of the following requirements:

### Division for Mortgage or Tax Purposes

The division of a tract of land into two (2) parts solely for one of the following purposes shall not be considered a division subject to platting regulations:

- 1. To establish a lien upon a portion of the tract, said lien being required by a financial institution to grant a loan for construction of a residence or related structure on said portion; or
- 2. To establish a different tax status on a portion of the tract (for example, to obtain a homestead exemption).
- 3. Both tracts created must have access to a publicly maintained road by frontage, public easement, or private ingress and egress easement.

Under this exception, ownership of the divided portion may not be conveyed separately from the remainder of the tract unless said conveyance is due to foreclosure on a loan or due to a tax sale. Any other separate conveyance will require compliance with subdivision regulations in effect at that time.

The County may require the property owner and/or developer to adhere to the terms of these Subdivision Regulations with regards to setbacks and lot frontages.

The property owner and/or developer must present to the County Engineer the following:

- 1. A letter requesting an exception under this section;
- 2. A copy of the deed for the tract to be divided; and
- 3. A plat of survey prepared and sealed by a land surveyor showing the division with legal descriptions of both tracts.

The County Engineer will present the exception request to the Court.

Upon approval of the Court, the County Engineer will supply the property owner and/or developer with a letter granting approval with the original court order attached, which shall be filed along with the plat of survey signed and sealed by the land surveyor.

# <u>Division to Change Line Between Two Existing Tracts and/or to Reconfigure</u> Existing Tracts

The division of a tract of land solely to change the line between two (2) or more existing tracts or to reconfigure two (2) or more tracts shall not be considered a division subject to platting regulations.

This exception applies only if the portion divided off of one (1) tract is conveyed to the property owner and/or developer of the adjoining tract or both tracts are owned by the same individual. Any conveyance of the divided portion separate from the adjoining tracts will require compliance with subdivision regulations in effect at that time.

The property owner and/or developer of the affected tracts are responsible for ensuring that the resulting tracts are of appropriate size and condition to comply with water and wastewater regulations.

The access to either tract cannot diminish in importance due to this division (meaning public road to public easement, public easement to private easement, etc.). County may require developer to adhere to the terms of these Subdivisions Regulations

with regards to setbacks and lot frontages.

In order to qualify for this exception, the property owner and/or developer must present to the County Engineer:

- 1. A letter requesting an exception under this section;
- 2. A copy of the deed for the tract to be divided; and
- 3. A plat of survey prepared by a land surveyor showing the division with legal

descriptions to both tracts.

Once these items are delivered to the County Engineer's Office, the proposed subdivision will be brought before the Court.

Upon approval of the Court, the County Engineer will supply the property owner and/or developer with a letter granting approval with the original court order attached, which shall be filed along with the plat of survey signed and sealed by the land surveyor.

# Division for Family

The tract is divided into four (4) or fewer parts and each lot is to be sold, given, or otherwise transferred to an individual who is related to the owner within the third degree by consanguinity or affinity, as determined under Chapter 573, Texas Government Code.

If at any time, any lot is sold, given, or otherwise transferred to an individual who is not related to the owner within the third degree by consanguinity or affinity, the platting requirements apply.

# Agricultural Use/Farm, Ranch, Wildlife, Timber

The land is to be used primarily for agricultural use, farm, ranch, wildlife management, or timber production use within the meaning of the Texas Constitution.

If a tract ceases to be used in any of the above-described uses, the platting requirements apply.

# More than 10 Acres

Property owner and/or developer divides tract of land into two (2) or more parts and all of the lots of the subdivision are more than 10 acres in area.

# Sold to Veterans

Property owner and/or developer divides the tract into two (2) or more parts and are sold to veterans through the Veterans' Land Board program.

### **Undivided Interest**

Property owner and/or developer divides the tract into two (2) or more parts and are transferred to persons who own an undivided interest in the original tract and a plat is filed before any further development of any part of the tract.

# **Further Development**

Property owner and/or developer divides the tract into two (2) or more parts and one (1) new part is retained by the property owner and/or developer and one (1) new part is to be transferred to another person who will further subdivide the tract subject to the plat approval requirements.

# **Notification to the County Engineer**

The property owner and/or developer shall provide written notification to the County Engineer of the intent to divide the land. Said notice must identify the exception said division qualifies and provide a sketch illustrating the division. The County Engineer will provide property owner and/or developer notification of receipt and acceptance of exception based upon the representations and information received. The County Engineer will require the preparation and filing of restrictions running with the land ensuring that any subsequent conveyance of any property resulting from an above referenced division shall be made in compliance with these rules.

# **SECTION G. PROCEDURE FOR VARIANCES**

When a property owner and/or developer can show, that due to no fault of his own, but because of strict interpretation of these Subdivision Regulations, a hardship has been created, the County may vary the Subdivision Regulations or exempt partially developed subdivisions, but only after the following events happen:

# **Application**

The property owner and/or developer shall file in the County Engineer's office an application stating clearly and definitely the reason for a request of variance. If approved by the County Engineer, the variance application will be submitted to the court.

# **Court Determination**

The Court shall determine the following facts

- 1. A hardship exists that is a result of the order or the natural features of the land and not the fault of the property owner and/or developer; and
- 2. The variance will not adversely affect the adjacent property nor will it be detrimental to the general public's interest.

# Federal Requirements

When a county-approved subdivision plat must also be approved by a federal agency, any changes by the federal agency shall be accepted by the Court as evidence of a hardship and the changes will be accepted. The County Engineer will require the preparation and filing of restrictions running with the land to ensure that all federal requirements are recorded in the Official Records of the County.

# **ARTICLE 5: DOCUMENT SPECIFICATIONS**

# **SECTION A. PRELIMINARY PLAN**

Two (2) copies of a preliminary plan are required to be delivered to the County Engineer before proceeding to the platting portion of the procedures specified in Article 5 of these Subdivision Regulations. The preliminary plan shall include:

- 1. Street layout including designations of private or public, concrete or asphalt, two (2) lane four (4) lane divided, etc.;
- 2. Commercial and residential designations;
- 3. Right-of-way for streets;
- 4. Average lot sizes (for each section if more than one (1) section);
- 5. Utilities designations (water system and sewer system) of private or public;
- Detention/mitigation areas;
- 7. Parks, squares, common areas, and other places of green space; and
- 8. Any other pertinent information the developer feels is appropriate.

#### SECTION B. PRELIMINARY PLAT

All subdivision plats shall receive their "official" consideration as "preliminary plat." At this stage, the following procedures are required.

The property owner and/or developer shall have a land surveyor or engineer prepare the preliminary plat in conformance with the format, design and improvement requirements of these Subdivision Regulations. If more than one sheet must be used, the scale shall not exceed 200 feet to 1 inch.

Where OSSFs are proposed, the plat shall provide the planning materials required by the Texas Health and Safety Code, Chapter 366 and 30 Texas Administrative Code Chapter 285 as well as a permit application delivered to the Environmental Health Department verifying compliance with same.

The Environmental Health Department shall make a determination on such compliance within 45 days of receiving the plat as required by 30 T.A.C. 285.4(c).

The preliminary plat shall provide the following items:

- 1. The abstract and survey in which the property is located;
- 2. A description of the boundary survey of the property having a maximum error of closure of 1:15,000;
- 3. Names and mailing addresses of the property owner and/or developer, engineer, land surveyor and registered sanitarium, if any;
- 4. Scale:
- 5. North point (with North being at the top of the map, if feasible);
- 6. Date of preparation;
- 7. Other pertinent legend data;
- 8. Total area, number of lots and approximate lineal feet in streets;
- Vicinity sketch or key map at a scale of not more than 2,000 feet to the inch showing the position of the subdivision with relation to the surrounding streets and properties and other important features such as railroads, corporate limits of an adjacent city;
- 10. Lotting design scheme (details below);
- 11. Boundary closure calculation (computer printout or calculation sheet); 100-year and 500- year flood plain map showing proposed plat boundary; Topographic map showing proposed plat boundary;
- 12. Soil survey showing proposed plat boundary, Geotechnical Report or USGS survey;
- 13. Report of compatibility of proposed OSSF with area-wide drainage and groundwater.

# Lotting Design Scheme

The design scheme will be drawn on a scale of not more than 100 feet to the inch (except where the minimum size lot is one (1) acre or more), in which case a scale of 200 feet per inch may be used. The following features shall be shown:

- 1. The location of existing property lines, boundaries of incorporated areas, existing easements, streets, buildings, lakes, water courses, and culverts within the tract or immediately adjacent within 200 feet thereof;
- 2. The proposed location and width of street right-of-ways;

- 3. Street names;
- 4. Lot lines and numbers must be shown, but no dimensions are required;
- 5. The names and boundaries of all adjoining subdivisions;
- Location of existing and proposed water systems, location and type of proposed O.S.S.Fs and their potential replacement areas in the event of such facilities' failure; and
- 7. Contours with intervals of 1 foot or less, when the general grade is less than 3%, and at interval of 5 feet or less when the general grade exceeds 3% (shall refer to M.S.L. data). Benchmarks shall be provided at convenient points with locations and elevations indicated on the preliminary plan.

### SECTION C. IMPROVEMENT PLANS

All improvement plans shall be approved by the County Engineer who shall certify that the plan is in conformance with these Subdivision Regulations and requirements. Variance from the requirements shall be permitted only by Court action.

The developer shall have an engineer prepare the improvement plans in conformance with the format, design, and improvement standards required by these Subdivision Regulations. Utility companies and other concerned public agencies should be consulted before these plans are prepared.

### **Construction Drawings**

The sheet size shall be 24"x 36". The drawings shall be referenced to the name and unit number of the proposed subdivision, shall show elevations based on M.S.L. datum plan, and shall be in compliance with the following information:

**Street Connections** - Per Local Government Code Ch. 232.0034, at least two means of ingress and egress to subdivisions are required in subdivisions consisting of 100 or more lots. The ingress and egress points shall be remotely located, defined as a distance apart of at least 1/2 of the length of the diagonal distance of the area to be served, measured in a straight line between accesses. If the development has less than 250 FT of frontage, then at a minimum roadway connections shall be created to adjoin with adjacent properties at a rate of I connection for every 100 lots.

**Street Plan Profile** - The plan of each proposed street indicating the existing ground elevations and proposed street grade surface including existing street grade for a distance of 100 feet beyond the tract boundary at a scale of not more than 100 feet per inch.

Typical Street Sections - A typical section of each proposed street, if all are not the

same, not to scale, but having horizontal and vertical measurements showing the width of proposed stabilization, road base, wearing surface, curbs, shoulders, ditches, etc.

All streets shall comply with the Design Standards herein with regard to rights of way, lane widths, geometry, structure, markings, signing, median design and widths and the specific requirements of the County Engineer when, in his judgment, safety or functionality alteration are required.

**Half streets** - Half-streets shall be prohibited, except when essential to the reasonable development of the subdivision in conformance with the other requirements of these regulations and the County Thoroughfare Plan, and where the Commissioner's Court finds it will be practical to require the dedication of the other one-half when the adjoining property is subdivided. Whenever a partial street previously has been platted along a common property line, the other portion of the street shall be dedicated.

**Cul-de-Sac's** - Cul-de-Sac termination of residential streets are encouraged provided they are no longer than 800 feet and do not serve other than single family residences. Turnarounds shall be a minimum of 100 Ft Diameter.

**Dead end or stub streets** - Dead-end or stub streets are to provide for access to adjacent land areas and in no case shall be more than two hundred fifty (250) feet in length or equal to one lot depth, whichever is greater. A temporary turnaround shall be provided and indicated on the plat and built in accordance with the design standards.

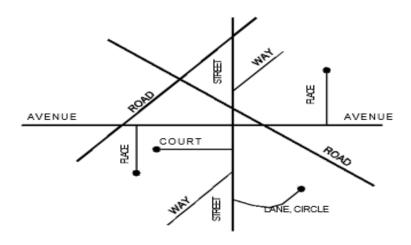

**New Streets** - New streets which are an extension of existing streets shall bear the names of existing streets and shall be constructed with appropriate transitions and widths.

**Street Names** - New street names shall not be named to duplicate or cause confusion with existing street names. New street names shall be approved by the County Rural Addressing Coordinator.

The naming convention for streets is as follows:

- a. Avenues Run east west;
- b. Streets -Run north south;
- c. <u>Ways</u> Are straight streets that run north east south west or south east north west and are less than 1000 feet in length;
- d. Roads Are continuous streets that run north east south west or south east north west and are major facilities;
- e. Courts Are streets that run east west and are less than 1000 feet in length;
- f. Lane or Circle May be used for Cul de Sac's and are less than 800 feet in length;
- g. <u>Place</u> Is a straight street than runs north south that is less than 1000 feet in length

# **STREET ADDRESSES**

Street addresses will be assigned by the County 911 Coordinator or public utility at the time of processing of the final plat or other recordable plat.

Water System and Sanitary Sewer System - The plans and profiles of proposed and existing water systems and sewer systems, if submitted to the required state agencies for approval, shall be submitted to the County Engineer prior to commencement of construction. Water service will be provided by public systems where reasonably available, defined as within 1/2 mile of any subdivision containing 10 or more lots, or within 500 feet of any subdivision containing between four lots and 10 lots. The agency providing water services shall define the requirements for each subdivision and Fees shall be established in accordance with the adopted regulations, ordinances or resolutions of these providers.

**Storm Sewer Drainage** - The size, location and typical sections of drainage ditches (or storm sewers, if used) including drainage reserves, shall be shown. All drainage plans, profiles and computations shall be submitted to the County Engineer for approval prior to construction.

**Existing Utilities** - Plans and profiles of existing utilities shall be shown where applicable.

**Benchmarks** – One or more shall be provided for all subdivisions as approved by the County Engineer, with description, location and M.S.L. elevations indicated on the improvement plan prepared in reference to NAD 83 Texas State Plane South Central Texas (foot).

**Comprehensive Drainage and Flood Plain Impact Plan** - Shall conform to the Chambers County Drainage Criteria Manual and these Subdivision Regulations.

**Fire Hydrants** – Required at a maximum spacing of 500 FT and at every intersection and cul-de-sac

.Fire hydrants shall color coded according to the flow available at the hydrant, subject to approval by the County Fire Marshal:

Table 3

1500 gpm or greater
1000 to 1499 gpm
500 to 999 gpm
Less than 500 gpm

Blue pavement reflectors shall be installed by the developer on roadways and streets near the center strip of the roadway, on the side of the stripe which the hydrant is located.

**Additional requirements** - Access control devices for a private street shall meet regulations adopted by the county (Chambers County Fire Code), including redundancy requirements (battery backup or manual over-ride). The description and specifications for the access control devices shall be submitted for approval with the plat. The developer shall provide all equipment necessary to operate the access control devices, which shall consist of Knox key devices compatible with the Chambers County Fire Marshal's Office Knox key pattern.

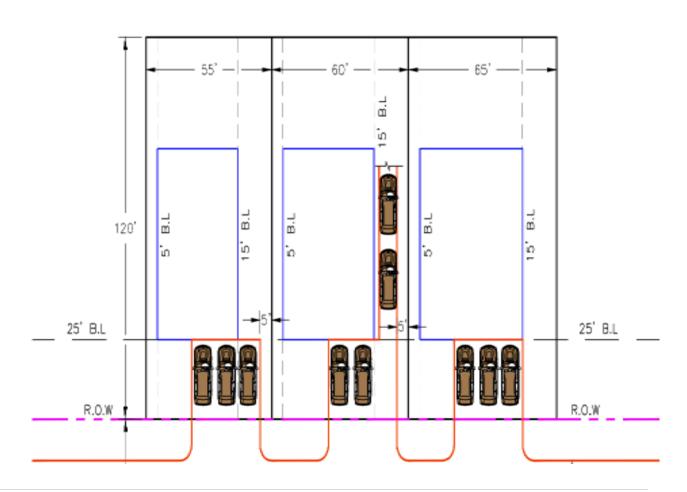

IBC 2015 Table 602 shall determine building setback lines of buildings and structures subject to county fire code.

# Building Lines and Setbacks - ALL STRUCTURES SHALL BE A MINIMUM OF 20 FEET FROM ANY STRUCTURE ON ADJACENT PROPERTIES. All COMMERCIAL AND INDUSTRIAL SHALL BE 50 FT BACK FROM AND STREET RIGHT OF WAY

Front Building Lines	Residential/Minor Streets	25 feet			
	Collector/Arterial Street Commercial/Industrial	50 feet			
	County/State Thoroughfare	50 feet			
Side lot setbacks					
Single Family	Lots less than 7200 square feet in area	15 feet & 5 feet or 10 feet either side			
Detached Residential:	Lots > than 7200 but < 10,000 sq. ft.	15 feet & 5 feet or 10 feet either side			
	Lots > 10,000 sq. ft.	15 feet & 5 feet or 10 feet either side			

No	n-Residential	20 feet when abutting a residential platted lot; residentially developed property, or undeveloped property. May be reduced to 10 feet when the common property line abuts a non-residential developed or plat restricted lot.
	Rear Lot setb	DACKS
Single Family Detached	Lots less than 7200 square feet in area	10 feet
Residential:	Lots > than 7200 but < 10,000 sq. ft.	10 feet
	Lots > 10,000 sq. ft.	10 feet
No	n-Residential	20 feet

#### Per Local Government Code Ch. 232.109:

In a subdivision that is not served by fire hydrants as part of a centralized water system, the developer shall be required to construct: (1) for a subdivision of fewer than 50 houses, 2,500 gallons of fire water storage; or (2) for a subdivision of 50 or more houses, 2,500 gallons of fire water storage with a centralized water system or 5,000 gallons of fire water storage. On-site storage of firewater shall consist of tanks, ponds, and dry fire hydrants as approved by the County Fire Marshal. The location of water connections shall be accessible to fire apparatus and compatible with the local fire department. Such storage systems shall be maintained, and have a means to maintain water level, such as a water well with float switch.

#### **Improvement Plan Review**

The County Engineer shall review the improvement plans and notify the developer in writing, of his approval, conditional approval or denial. In no case shall the County Engineer be authorized to vary the requirements of these Subdivision Regulations, since variances can only be granted by action of the Court as prescribed herein.

#### Physical Improvement Drawings

A blackline set of the original drawings showing the "as- built" plans of the installed improvements shall be provided at the request of the County Engineer.

#### **SECTION D. FINAL PLAT**

#### Final Plat Materials

The final plat materials, which all property owners and/or developers are required to submit, shall consist of two (2) groups of materials – plats(s) for recording and forms filed with the County Engineer. The property owner and/or developer shall have a land surveyor prepare the final plat in conformance with the format, design, and improvement requirements of these Subdivision Regulations. The Final plat will not be recorded until all construction of streets, drainage and improvements are completed in accordance with County specifications and requirements unless a bond is provided as described here in.

The drafting of this plat shall be such that the original, presented to the Court for signing, will be on mylar or stable base film (0.004 inches thick, minimum) and shall contain dark, stable India ink lines which cannot be smudged or removed by ordinary handling. The overall sheet size shall be 24"x36" with a half inch margin on all sides. If necessary, more than one sheet may be used as long as a key map is shown to relate each sheet to the entire platted area. The information required on the face of this sheet is as follows:

- 1. Title Block
- Legal Description A written legal description of the property platted, tied to an original corner of the original survey and placed at an appropriate location of the face of the plat.
- 3. Location Sketch A sketch or "key map" at a scale of not more than two (2) miles to

the inch showing the position of the subdivision with relation to surrounding streets and properties and also showing other important features such as railroads and corporate limits of an adjacent city.

- 4. Dedication The dedication shall:
  - a. Be per Appendix A (for corporations), Appendix B (for individuals), and Appendix C (Lien Holder Acknowledgment); and
  - b. Be approved by the County Attorney.
- 5. <u>Lotting Design Scheme</u> The design scheme shall be drawn at a scale of not more than 100 feet to the inch, unless lots are one (1) acre or more in size; then a scale of 1 inch = 200 feet may be used with North oriented to the top of the sheet when possible and shall show the following:
  - a. <u>Street lines</u> with names and widths, control point references;
  - <u>Subdivision plat</u> boundary lines of tract, monuments of tract, street centerlines with bearings and distances, easements, lot lines with accurate dimensions, street names, lot numbers, blocks lettered alphabetically or numbered, reservations and dedications; and
  - c. The size of each lot.
- Benchmarks One or more shall be provided for all subdivisions at convenient points with description as approved by County Engineer, location and M.S.L. elevations indicated on the plat prepared in reference to NAD 83 Texas State South Central Texas (foot).
- 7. <u>Certificate of Land Surveyor</u> Per Appendix D.
- 8. <u>Certificate of County Engineer</u> Per Appendix E if not within city E.T.J.
- 9. Approval by Plat Room Recorder
- 10. Certificate of the Court Per Appendix F if not within city E.T.J.
- 11. <u>Certificate of Clerk</u> Per Appendix G.
- 12. Certificate of City Council Per city instruction if within city's E.T.J
- 13. Pipeline Note Per Appendix H.
- 14. Flood Plain Certificate Per Appendix I.

- 15. <u>Drainage District Approval</u> A signature block for any appropriate drainage district to sign.
- 16. Application Attach appropriate forms:
  - a. For final plat approval;
  - b. For small subdivision approval; and
  - c. For variance.
- 17. <u>Joint Use Agreement (if applicable)</u> A letter from the utility company stating that they have no objection to the proposed road crossing their easement. If the utility company operates a pipeline within the easement, the letter shall further state that the pipeline either meets the requirements in Article 7, Section I —Pipeline Crossing -- or has been adjusted to meet these requirements.
- 18. Certificate of Ownership See Article 2 "Definitions."
- 19. <u>Additional Plat Statements</u> The following statements shall be noted on the face of the final plat:

I do hereby dedicate forever to the public a strip of land \_\_\_ feet wide on each side of any and all gullies, ravines, draws; sloughs, rivers, or other natural drainage conveyances located in or adjacent to said subdivision as easements for drainage purposes, giving the County or any public agency the right to enter upon said easement at any and all times for any public purpose.

FURTHER, I hereby relinquish all rights of access to major streets or thoroughfares shown hereon except by way of the platted streets shown.

All drainage reserves and easements shall be kept clear of fences, buildings, tree, shrubs, and other obstructions to the operations and maintenance of the drainage facility and abutting property shall not be permitted to drain to the easement except by means of an approved drainage structure.

All reserves and easements shall be maintained by the Home Owners Association, Subdivision Developer/ Owner.

#### **Recording Final Plat**

The final plat shall be recorded immediately after approval of the improvements by the Court.

Property owner and/or developer must provide a tax certificate from each tax collector of a political subdivision in which the property is located, with the plat to be recorded, showing that all taxes owing to the county, school district, drainage district and/or all other

political subdivisions have been paid in full to date.

The property owner and/or developer shall furnish three (3) copies to be distributed as follows:

- 1. Clerk's Office Original mylar; and
- 2. <u>County Engineer's Office</u> One (1) mylar copy and one (1) paper copy. Original and copies shall conform to "Final Plat."

#### **SECTION E. DISPUTES AND DISCREPANCIES**

To prevent disputes and litigation, the County Engineer shall decide all questions and difficulties, of whatever nature, which may arise relative to the interpretations of the plans, construction, prosecution and fulfillment of the contract. In the event a dispute or discrepancy in the plans or specifications cannot be resolved, an arbitration committee, comprised of the developer's engineer, the County Engineer and an independent third-party engineer, agreeable to both, will resolve the dispute/discrepancy. Such resolution shall be final. The fee of the third engineer shall submitted to the County and paid by the County. The fee shall be reimbursed to the County by the property owner and/or developer.

#### SECTION F. CONSTRUCTION AND WARRANTY BOND

If the owner and/or developer desire the County to take over maintenance of the subdivision immediately after construction of all improvements have been completed, then the property owner and/or developer shall give a good and sufficient warranty bond for the proper construction of the streets, roads, and drainage requirements in all subdivisions prior to subdividing the tract. Such bond may either be a performance bond executed by a surety company authorized to do business in the State of Texas or an irrevocable letter of credit from an acceptable Texas bank. The form of the bond must be approved by the County Attorney.

Such warranty bond or letter of credit shall be made payable to the "County Judge or his successors in office," conditioned that all roads, streets, and drainage requirements within said subdivision have been constructed in accordance with these Subdivision Regulations and that said improvements be to County standards after the warranty period has lapsed and final acceptance has been requested.

The warranty bond or letter of credit shall be in an amount equal to 50% of the actual cost of constructing such streets, roads, and drainage requirements. The County Attorney must approve, in writing, the form of said bond or letter of credit.

The warranty bond or irrevocable letter of credit must remain in full force and effect after the subdivision has been approved and all improvements have been completed in

accordance with plans and specifications to the satisfaction of the Court. Said bond shall continue in effect until the improvements have received final acceptance into the county road system after a warranty period of at least 24 months in length and 50% of homes have been completed.

The County may vary the Subdivision Regulations if the property owner and/or developer files with the Court, an application stating clearly and definitely the reason for a request of variance.

#### SECTION G. FINANCIAL RESPONSIBILITIES AND GUARANTEES

- 1. To protect the public interest, the Commissioner's Court of Chambers County hereby decrees under the provisions of Chapter 232, Local Government Code, that the Owner of any tract of land that desires to obtain approval of a subdivision plat for recording a plat in the County records shall construct all roads and drainage facilities, including storm water detention, and any other items required by other governmental agencies, in said subdivision to the standards and specifications set forth in the Engineering Guidelines incorporated as Appendix B of these Regulations before offering said plat for approval, unless exempted by Section 7.2.
- 2. If the owner desires to have the plat placed on record before completion of construction of the roads and drainage, then the owner shall give a good and sufficient bond, cash, or letter of credit. This security must be payable to the County Judge, or his successors in office, of Chambers County, Texas, for the estimated cost of rebidding and proposed construction according to the calculations of a Registered Professional Engineer. The security shall be 115% of the cost for rebidding and proposed construction. Release of the security shall be conditioned on the completion (in compliance with the Engineering Guidelines) of all the roads and drainage facilities shown on the plat. The surety will be required for the construction of the detention facility prior to beginning construction of the subdivision improvements. This surety will be released upon completion of the construction of the detention facility and acceptance of the construction by the County Engineer.
- 3. In areas within the ETJ of a city, the city letter of credit policy may apply if the Commissioners' Court finds that the City policy provides adequate protection of the County's and public's interest in the land development and construction of infrastructure, and the County is named with the City on the financial document.
- 4. The Owner shall be entitled to partial reductions of the security requirement upon written approval by the County Engineer and the County Judge, and in accordance with the City ordinance when the subdivision lies inside the ETJ of a city.
- Security shall expire after a period of two years, and shall automatically renew for subsequent two- years periods until construction of all roads and 50% build out of homes has been completed and the security is released. At the end of each two-year

- renewal period, an increase in the surety amount may be required due to cost increases in construction labor and materials, and administrative costs, experienced over the previous two-year period.
- 6. The Owner shall submit construction plans for roads, drainage, traffic signage and utilities within a platted subdivision to the County Engineer for approval prior to beginning construction. Digital submission and other hard copy requirements as specified within this manual is required for review. These plans shall show the location of water, sanitary sewer and storm sewer utilities, and shall show proposed easements for privately- owned utilities (electric, cable television, gas, telephone, etc.) These plans shall include the design requirements as described in Appendix B, Engineering Guidelines. The cover sheet of the construction plans shall contain a signature block for approval of the County Engineer.
- 7. Upon approval of the construction plans, the Owner shall pay an inspection fee in the amount of 2% of the estimated construction cost for the roads and drainage facilities, according to calculations by a Registered Professional Engineer. These calculations must be approved by the County Engineer.
- 8. When submitting the construction plans for approval by the County Engineer, an electronic version of the construction plans (.pdf format) shall accompany the construction cover sheet.
- 9. For all landscaping, irrigation, sidewalks, illumination, water quality features, etc within the right-of-way, the Owner shall create a mandatory homeowners association that shall be responsible for the maintenance and liability of these features. This organization shall have assessment authority to insure the proper funding for maintenance. A maintenance agreement shall be executed between the County and the organization prior to acceptance of the construction.
- 10. Once the construction has been completed and the County Engineer has approved the construction, the Owner shall provide the County Engineer with a digital file of the "As Built" plans showing the original approval signatures and the seal of a Registered Professional Engineer. A paper copy is not required. These plans are to show the improvements as they were actually built. The file shall be in an Adobe .pdf format. After the "As Built" plans are received and all construction deficiencies have been satisfied, the County Engineer will provide the Owner with a letter accepting County maintenance of the roads within the subdivision.
- 11. When traffic signal and additional turn lanes are required due to anticipated future traffic generated by the subdivision as determined by the County Engineer or an independent traffic engineer, the cost of future traffic signals shall be deposited with the County. Installation of such signals shall be the responsibility of the Owner. Turn lanes shall be constructed in conjunction with the roadways.

#### **SECTION H. MAINTENANCE**

- 1. By accepting a subdivision plat for filing, the Commissioner's Court does not thereby accept the roads in the subdivision for ownership or maintenance by the County. The Owner of the platted lots is responsible for maintenance of all roads within subdivision until such time as the construction of the roads have been accepted by the County which is after a minimum of 2 years from completion and 50% build out of homes.
- 2. The County will consider accepting a road for maintenance only after dedication to the public of an easement or fee interest in the roadway.
- 3. In addition, written certification from a Registered Professional Engineer is required, stating that the facilities were constructed in accordance with the applicable subdivision regulations with any approved variances in effect when the subdivision was recorded (or has been upgraded to those standards). If a final plat for the subdivision where the facilities are located was never recorded, the facilities must meet the current applicable subdivision regulations with any approved variances.
- 4. If the owner desires to have the County take over maintenance of roads and roadside drainage immediately, then at the end of construction of the subdivision, but prior to acceptance of the roads by the County, the Owner shall provide to the County a warranty bond in the amount of 50% of the cost of construction of the roads and drainage of the subdivision. This security must be payable to the County Judge, or his successors in office, of Chambers County, Texas and may be provided by the contractor. Upon receipt of the surety and the acceptance of the construction, the County will accept the roads for maintenance. The surety will be released two years and 50% of home build out from the date of the acceptance of the roads unless failure of workmanship or materials, in the sole opinion of the County Engineer, has occurred. The Owner will be notified of any deficiencies and given the opportunity to repair such deficiencies. If the Owner does not provide repairs within 90 days, the bond will be used by the County to repair these deficiencies.
- 5. The enforcement of plat restrictions is the responsibility of the Owner(s) of the subdivision; however, in an Extraterritorial Jurisdiction both the city and the Commissioner's Court of Chambers County shall have the right and authority to enforce plat restrictions through appropriate legal procedure to prohibit the construction or connection of utilities, or issuing of permits unless or until the requirements of the plat restrictions have been achieved.
- 6. The County will assume no responsibility for drainage ways or easements in the subdivision outside of the roadway right-of-way. Maintenance and liability of improvements including but not limited to landscaping, illumination, sidewalks, water quality features, or any other improvements shall not be the responsibility of the County.

#### **SECTION I. PRIVATE SUBDIVISION**

If an Owner wishes to create a subdivision utilizing private roads, it must meet the following requirements:

- 1. Private roads must meet all county road standards, except where specific variances have been granted by Commissioner's Court for adequate cause in each case.
- 2. The title of the final plat for private subdivisions shall contain the phrase, "A Private Subdivision".
- 3. The subdivision plat and restrictions must contain a statement that Chambers County will never accept or maintain the roads.
- 4. A homeowners association with assessment authority shall be formed in conjunction with the recording of the final plat. Membership in the association shall be mandatory for each lot owner. The association shall be responsible for the maintenance of the roads in the subdivision.
- 5. The subdivision plat must contain a statement that the roads shall be maintained to such a standard which will allow emergency vehicles access for the roadway design speed in perpetuity by the homeowners association, and must contain a mechanism for assessing the Owners within the subdivision to produce adequate revenue for perpetual maintenance.
- 6. The plat must contain a requirement that every deed contain notice to the grantee that all roads are private, that the homeowners association shall be perpetually liable for maintenance, that the County will never accept them for maintenance, and that the quality of the roads must be maintained as to not affect access by public service agencies such as police, fire, and emergency medical services.
- 7. All arterial roads must be dedicated to the public and constructed to County standards. Other roads shall be dedicated to the homeowners association for the use of the property owners, their assigns and successors, and emergency response agencies.
- 8. A sign shall be placed at the entrance of the subdivision clearly stating that the roads in this subdivision are private roads. The location of this sign shall be shown in the construction plans.
- 9. The Owner shall provide a maintenance schedule for the roads to the County Engineer for approval prior to placement of the final plat on the Commissioners Court agenda for approval. The schedule shall include the maintenance activities, their cycle of occurrence, and the current cost of providing the maintenance activity. The total cost of the activities along with a rate of inflation shall be used to determine the annual assessment per lot.

- 10. Any Owner that gates the entrances to the subdivision shall provide either a crash gate or a lock box and a letter of approval from all of the affected emergency response agencies stating their approval of full time access to and from the subdivision.
- 11. The County will not be responsible for providing enforcement of traffic control within private subdivisions.

#### **SECTION J. VARIANCES**

- 1. The Commissioner's Court of Chambers County shall have the authority to grant variances from these Regulations when the public interest or the requirements of justice demands relaxation of the strict requirements of the rules.
- 2. Any person who wishes to receive a variance shall apply to the County Engineer.
- 3. The decision of the Commissioner's Court whether to grant or deny a variance is at its complete discretion, and shall be final.

#### **SECTION K. PENALTIES**

- 1. Section 232.005 of the Texas Local Government Code, as amended, provides for the enforcement of the state subdivision laws and of these Regulations.
- 2. A person commits an offense if the person knowingly or intentionally violates a requirement of these Regulations, including the Engineering Guidelines and other appendices incorporated herein. Such offense is a Class B Misdemeanor, punishable by (1) a fine not to exceed \$2,000; (2) confinement in jail for a term not to exceed 180 days; or (3) both such fine and confinement. (Texas Penal Code, Title 3, Ch. 12, Sec. 12.03, as amended).
- 3. A person may be jointly responsible as a party to an offense if the person (acting with intent to promote or assist the commission of the offense) solicits, encourages, directs, aids, or attempts to aid another person to commit the offense (Texas Penal Code, Title 2, Sec. 7.01, as amended). Thus, a real estate agent or broker, a lender, an attorney, a surveyor, an engineer, a title insurer, or any other person who assists in violating these Regulations may also face criminal penalties.
- 4. Besides prosecuting a criminal complaint, the County Attorney or other prosecuting attorney for the County may file a civil action in a court of competent jurisdiction to enjoin any violation or threatened violation of these Regulations, and to recover damages.
- A tract that has been subdivided without compliance with these Regulations will be ineligible to obtain a permit for the construction or modification of an On-Site Sewage Facility located on the tract.

#### **APPENDIX A: PLATTING GUIDELINES**

As a guide to the public in determining when it is necessary to file a plat and comply with these Regulations (as amended), the Commissioner's Court (as an incident of its power to enforce the subdivision laws and regulations under Chapter 232, Texas Local Government Code, as amended) has adopted the following policy guidelines stating when the division of an existing tract shall be considered by the Court to be a subdivision requiring the filing of a plat by law, and thus requiring compliance with these Regulations:

#### A1. PLAT REQUIRED

- A1.1. Unless otherwise specifically exempted in these regulations, a plat is always required when:
  - A1.1.1. A parent tract is divided into two or more daughter tracts, or
  - A1.1.2. If roads, parks or other parts of the tract are intended to be dedicated to public use.
- A1.1. If a plat is required under these guidelines, it is immaterial that the sale of daughter tracts is by contract, option, long-term lease (60 months or more), or lease-purchase, rather than by deed, or that the daughter tracts are described by metes and bounds rather than lot and block.
- A1.2. The final plat must be filed and recorded with the Chambers County Clerk.

#### **A2. EXCEPTIONS BY LAW**

- A2.1. A property that fronts on a public street whose boundary has not changed since February 1, 2000 is considered a legal lot. [Texas Court of Appeals, Elgin Bank v. Travis County]
- A2.2. In accordance with Section 232.0015, Texas Local Government Code, as amended, the filing of a plat is not required when the Owner does not lay out a part of the tract as described by subsection A1.1.2. and when:
  - A2.2.1. All daughter tracts are greater than 10 acres. [LGC § 232.0015(f)]
  - A2.2.2. The land is to be used primarily for agricultural use, as defined by Article VIII, Section 1d, Texas Constitution, as amended, or for farm, ranch, wildlife management, or timber production use within the meaning of Art. VIII, Sec. 1-d-1, Texas Constitution, as amended. [LGC § 232.0015(c)] If a tract of land ceases to be used primarily for these uses, the Owner shall be required to comply with these Regulations on the same basis as any newly divided tract. [LGC § 232.0015(d)]

- A2.2.3. A person makes a conveyance of four or fewer tracts, each of which is sold, conveyed, given, or otherwise transferred, to persons who are related to the Owner within the third degree of consanguinity (parent, child, grandparent, grandchild, sister, brother, great-grandparent, great-grandchild, aunt, uncle, niece, nephew) or affinity (the spouse of anyone listed above, or so related to the Owner's spouse) for their personal use; provided, however, that each daughter tract is either located on a public road or has access to such a road by a private easement. [LGC § 232.0015(e)]
- A2.2.4. All daughter tracts are to be sold to veterans through the Veteran's Land Board Program.[LGC § 232.0015(g)]
- A2.2.5. The owner of the land is the State of Texas, an agency, board or commission of the State of Texas, or a permanent school fund or other dedicated fund of the State, and the Owner does not lay out any part of the tract for roads, parks, or other areas for the common use of two or more tracts or for the use of the public. [LGC § 232.0015(h)
- A2.2.6. The Owner is a political subdivision of the State of Texas, the land is situated in a floodplain, and all lots are sold to adjoining landowners. [LGC § 232.0015(i)]
- A2.2.7. The Owner divides the tract into two parts and one new part is retained by the Owner and the balance of the property is transferred to another person who will further subdivide the tract subject to the platting requirements herein. [LGC § 232.0015(j)]
- A2.2.8. The Owner transfers all parts to persons who owned an undivided interest In the original tract and a plat is filed before any further development of any part of the tract. [LGC § 232.0015(k)]

#### A3. ADDITIONAL EXCEPTIONS

- A3.1. The Commissioner's Court has adopted the following additional policy guidelines stating when the division of an existing tract shall be considered exempt from the requirements for filing of a plat:
  - A3.1.1. Any tract whose boundary has not changed since February 21, 1985 may be sold in its entirety without being platted.
  - A3.1.2. A plat is not required when daughter tracts are created solely for purposes of platting them as individual subdivisions in their own right. The Owner must submit to the Court the preliminary plat for the project as a whole before claiming this exception.
  - A3.1.3. A plat is not required when two adjacent landowners adjust or change the

property lines which separate their respective tracts, so long as there is the same number of tracts and Owners after the transaction as existed before it. (and does not create other plat issues) This exemption applies whether the transaction requires an exchange of land by both Owners, or only a transfer of land from one Owner to the other, and whether the transaction takes the form of a sale or of an exchange in kind.

- A3.1.4. Any land added to a tract through such a transaction shall become an integral part of that tract, and may not be separately conveyed except in compliance with the subdivision laws. Each resulting tract shall, of course, be subject to the minimum lot size requirements of these Regulations and other applicable laws. This exception does not apply if the adjustment will change the boundary between two legally platted lots, or add or subtract land from a legally platted subdivision. This exemption may not be exercised within two years of exercising another exemption.
- A3.1.5. A plat is not required when a smaller tract is surveyed out of the parent tract solely for the purposes of obtaining financing for purchase or improvement of that part of the property, provided that possession and primary beneficial ownership of the entire parent tract are intended to remain unified.
- A3.1.6. A plat is not required when a smaller tract is created by the legitimate foreclosure of a valid lien on a part of the parent tract. This provision does not exempt sham transactions or foreclosures staged to avoid the platting requirement.
- A3.1.7. A plat is not required if the property has been divided by the final decree of a court of record with appropriate jurisdiction.
- A3.2. All exemptions in this subsection must be approved in writing by the County Engineer prior to the division of the property. To claim any exemption, the person or entity who claims to be entitled to any exclusion to platting set out in these Guidelines must provide:
  - A3.2.1. An affidavit claiming the exemption and setting out the detailed basis for exclusion from the platting requirement, subject to penalties of perjury (Appendix P).
  - A3.2.2. A copy of the deeds or other instruments creating the daughter tracts referenced in the affidavit.

#### **A4. VESTING REQUIREMENTS**

- A4.1. In accordance with V.T.C.A., Chapter 245, Local Government Code, a completed application submitted prior to the effective date of the ordinance from which this chapter is derived will be reviewed on the basis of any regulations or requirements in effect at the time the completed application is filed; unless, at the applicant's option, the applicant elects to proceed under the new regulations or requirements.
- A4.2. In reliance upon properly issued permits or approvals, any applicant that claims exception from any provision of this subchapter based upon a claim of vested rights shall file a request for vested rights determination with the County demonstrating:
  - A4.2.1. The applicant made substantial financial commitments or assumed substantial financial obligations within the purview of the activities authorized by said permit or approval; and
  - A4.2.2. The applicant has proceeded in good faith, and no approvals or permits have lapsed or been revoked; or
  - A4.2.3. The applicant has established any other factor which may establish vested rights under state or federal law; or
  - A4.2.4. The applicant filed an application as provided in VTCA, Local Government Code ch. 245 prior to adoption of the regulations against which vested rights are claimed, that the regulations against which vested rights are claimed are not subject to an exemption as provided in VTCA, Local Government Code § 245.004 and that the project has not become dormant as defined in VTCA, Local Government Code § 245.005 and this chapter.
- A4.3. After receiving a request for vested rights determination, the County shall review the request and approve, deny or request additional information to be provided for consideration of the request within 20 working days. Upon review of the request, if the County finds that the applicant has provided sufficient information to establish that one or more permits exists on a project, the administrator shall issue a certificate to the applicant recognizing vested rights for the project and the terms and conditions required for the continuance of the vested rights.

#### A5. PRIVATE REAL PROPERTY RIGTHTS PRESERVATION ACT

A5.1. The County acknowledges a duty to comply with the Texas Real Property Rights Preservation Act ("Act"). In compliance with the Act, the County will prepare, periodically update and approve a Takings Impact Analysis, after requisite public hearings and notice.

### **APPENDIX B: ENGINEERING GUIDELINES**

#### **B1. LOT REQUIREMENTS**

- B1.1. For determining the area required for an on-site sewage facility, the minimum lot size shall be in accordance with the current regulations of the Chambers County and Environmental Health Department. Refer also to Appendix F1.
- B1.2. Minimum lot width requirements shall be in accordance with Appendix F1.
- B1.3. Minimum building setback requirements shall be in accordance with Appendix F2.

#### **B2. ROAD ALIGNMENTS**

- B2.1. Roads shall be laid out so as to align with existing roads in adjoining or nearby subdivisions. No gaps between the subdivision and the public roadway system may be left. Arterials shall be placed and designed in accordance with the HGAC plan, the Chambers County Long Range Transportation Plan, or any other arterial roadway plan that contains the subdivision. Collectors and arterials shall be placed to facilitate the safe and efficient movement of traffic and in consultation with the County Engineer.
- B2.2. New roadways that do not connect to an existing public road will not be approved.
- B2.3. The County may require an internal road system that minimizes driveways and cross streets to existing County or other public roadways. The County may also require that lots bordering on an existing arterial road have access to an internal platted road and the final plat shall contain a restriction requiring driveways to connect only to an internal platted road.

#### **B3. MINIMUM ROAD DESIGN REQUIREMENTS**

**B3 Intersections** - Curve radii, measured from the face of curb, shall be twenty-five feet (50') minimum on local residential streets and thirty feet (50') minimum on residential major thoroughfares. The minimum curb radii shall be fifty feet (50') or more, depending on an evaluation of vehicular types and volumes in commercial or industrial areas. Minimums should be increased at skewed intersections.

Street and traffic lanes shall be properly aligned across an intersection. Proposed streets shall be aligned with existing streets.

- B3.1. The Owner must improve all existing roads within the plat, as well as all boundary roads to which the proposed subdivision will have direct access, to meet the requirements of these Regulations. The exclusion from the plat of a road that would provide access to future plats will not be permitted. Lots intended specifically for future roads will not be approved.
- B3.2. Unless otherwise stated in these Regulations, all roads shall be designed in accordance with the latest version of the Institute of Texas Department of Transportation, "Roadway Design Manual", the latest version of the American Association of State Highway and Transportation Officials (AASHTO) "A Policy on Geometric Design of Highways and Streets. Should there be a conflict between these publications, the more stringent value shall overrule. All references to "mountainous terrain" shall not apply to the County.
- B3.3. For purposes of this Appendix, ADT shall be defined as the anticipated average daily traffic at the time of complete build out of the subdivision, including any future development that may be served by a given road. For planning purposes, it shall be assumed that any future residential lots will generate 8 ADT. If an area of future development consists of two or more acres, it shall be assumed that such development will produce an ADT of 32 per acre, unless there is a note prohibiting future subdivision.
- B3.4. Arterial roads shall be designed as follows:
  - B3.4.1. If the arterial is included in the HGAC plan or the Chambers County Long Range Transportation Plan, either now or in the future, the right-of-way and pavement cross section shall be as required in the said plans.
  - B3.4.2. The maximum right-of-way width for all other arterial roads shall be 120 feet.
- B3.5. Collector roads shall be designed as follows:
  - B3.5.1. If the collector is included in a roadway or transportation plan, the right-of-way and pavement cross section shall be as required in the plan.
- B3.6. Local Roads shall be designed as follows:

- B3.6.1. The minimum right-of-way width shall be 70 feet for rural residential subdivisions and 50 feet for urban residential subdivisions and all nonresidential subdivisions.
- B3.7. The following standards apply to all roads:
  - B3.7.1. Roads shall be dedicated to the public except as indicated in this manual. The Owner may dedicate either the fee Ownership in the land or an easement for road, drainage and utility purposes, at the Owners' option.
  - B3.7.2. Where concrete curb and gutter are constructed, they shall be 6 inches in width. Where concrete laydown curbs are constructed, they shall be 12 inches in width. For both types of curb, the pavement base course shall extend 18 inches beyond the back of the curb. All urban subdivisions shall utilize concrete curb and gutter. All concrete curb shall contain steel reinforcement.
  - B3.7.3. Approaches to intersections shall have a minimum pavement width of 39 feet, for a minimum length of 50 feet, when it is anticipated that, at full build out of the subdivision, the number of left turns from the approach will exceed 100 vehicles per hour.
  - B3.7.4. Driveway spacing on roads without curb and gutter shall be approximately 100 feet measured from center to center.
  - B3.7.5. In new subdivisions, the Owner shall install cluster mailboxes at location(s) approved by the County Engineer. The placement of individual or cluster mailboxes along arterial and collector roads shall not be permitted in new subdivisions, unless specifically approved by the County Engineer. Mailboxes shall not encroach in any fashion on or over sidewalks or other public walks or ways in the County right-ofways and shall be installed in accordance with applicable postal regulations.
- B3.8. The following requirements apply to dead end roads and cul-de-sacs:
  - B3.8.1. Dead end roads in developments that are not proposed to be extended at some time in the future and have a throat length of 150 feet or less shall have a cul-de-sac with a minimum radius of 50 feet.
  - B3.8.2. Cul-de-sacs shall be constructed on a sufficient grade to insure a minimum cross slope grade and along the flow line

of the gutter.

- B3.8.3. "No Outlet" signs shall be placed at the entrance to the dead end road, even if the road is planned to be extended at some time in the future.
- B3.8.4. Dead end roads that end at undeveloped property must be extended to the property line. At the terminus, a temporary cul-de-sac shall be provided for all such streets having a throat length more than 150 feet, constructed in accordance with the requirements of this Appendix. Hammerhead design are not preferred; however, alternate designs, such as landscape center islands, may be considered by the County Engineer to ensure a sufficient turnaround area is provided.
- B3.8.5. For all temporary cul-de-sacs, temporary easements shall be established for the portions of the cul-de-sac which lie outside the road right-of-way. Such easements which lie within the plat boundary shall be shown on the final plat. Easements which lie outside the boundary of the plat may be in the form of a separate document, but must be recorded prior to construction of any roadway improvements.

#### B3.9. Additional Right of Way for Existing Roads

When a subdivision is adjacent to an existing road, the County Engineer shall determine the right- of-way width that will be necessary for the maintenance and improvement of the existing road. If the existing road is a major thoroughfare, as defined herein, the Owner shall dedicate to the public up to 120 feet in overall width of the right-of-way, as determined by the County Engineer. The Owner may dedicate either the fee ownership in the land or an easement for road, drainage and utility purposes, at the Owners' option.

#### **B4. CONSTRUCTION – GENERAL**

- B4.1. A preconstruction meeting shall be scheduled prior to the start of construction. The Design Engineer, Owner, Contractor, Subcontractors, and County Engineer shall attend this meeting. All roads are to be constructed in accordance with the construction documents as approved by the County Engineer and in accordance with the specifications found in the current version of the "Texas Department of Transportation Manual Standard Specifications for Construction of Highways, Streets, and Bridges" unless otherwise stated on the construction documents approved by the County Engineer.
- B4.2. All materials shall be sampled and tested by a County approved

Independent Testing Laboratory in accordance with the construction documents approved by the County Engineer. The Owner shall pay for all testing services and shall furnish the County Engineer with certified copies of these test results. The County Engineer must approve the test results prior to constructing the next course of the roadway structure. Any material which does not meet the minimum required test specifications shall be removed and recompacted or replaced unless alternative remedial action is approved in writing from the County Engineer.

- B4.3. Except for electrical lines, all underground nonferrous utilities within a right-of-way or easement must be accompanied by ferrous metal lines to aid in tracing the location of said utilities through the use of a metal detector.
- B4.4. All pavements shall meet requirements outlined in the appendix as a minimum. Alternatives for consideration by the County Engineer shall be designed by a Registered Professional Engineer. The design shall be based on a 20-year design life and in conjunction with recommendations based upon a soils report of samples taken along the proposed roadways. Test borings shall be placed at a maximum spacing of 500 feet or other sampling frequency approved by the County Engineer based on recommendations provided by the geotechnical engineer. The soils report and pavement design shall be submitted to the County Engineer for review. The pavement design must be approved by the County Engineer prior to or concurrently with the review and approval of the construction plans. In addition to the basis of the pavement design, the soils report shall contain the results of sampled and tested subgrade for plasticity index, pH, sulfate content, and maximum density.

#### **B5. SUBGRADE**

B5.1. The preparation of the subgrade shall follow good engineering practices as directed by the County Engineer in conjunction with recommendations outlined in the geotechnical report. When the Plasticity Index (PI) is greater than 20, a sufficient amount of lime shall be added as described in Item 260 of the current edition of the TxDOT Standard Specifications for Construction until the PI is less than 20. If the addition of lime as described in Item 260 is not feasible, an alternate stabilizing design shall be proposed and submitted to the County Engineer for approval. The subgrade shall be prepared and compacted to achieve a dry density per TxDOT Item 132. In addition, proof rolling may be required by the County Engineer.

B5.2. The subgrade shall be inspected and approved by an Independent Testing Laboratory and a certified copy of all inspection reports furnished to the County Engineer, who must approve the report prior to application of the base material. All density test reports shall include a copy of the work sheet showing the percentage of the maximum dry (Proctor) density. The number and location of all subgrade tests shall be determined by the County Engineer.

#### **B6. BASE MATERIAL**

- B6.1. Base material shall conform to Item 247 of the current edition of the TxDOT Standard Specifications for Construction, "Flexible Base". The base material shall be Type A Grade 1, Type A Grade 2, or as approved by the County Engineer.
- B6.2. Each layer of base course shall be tested for in-place dry density and measured for compacted thickness. The number and location of all base test samples shall be determined by the County Engineer.
- B6.3. The base shall be prepared and compacted to achieve a minimum of 100% of the maximum (Proctor) dry density or as approved by the County Engineer upon recommendation by the testing laboratory. The maximum lift shall not exceed six inches. The base must be inspected and approved by an Independent Testing Laboratory and a certified copy of the test results furnished to the County Engineer for approval. Prior to the placement of the first lift of base, the stockpile shall be tested for the specifications found in Item 247 Table 1 and the result furnished to the County Engineer for approval

#### **B7. BITUMINOUS PAVEMENT**

B7.1. Roads require a wearing surface of HMAC Type D. The mix shall be from a TxDOT certified plant. The mix design shall be submitted to the County Engineer for approval prior to placement of the material. Contractor's Quality Control (CQC) test reports shall be submitted to the County Engineer on a daily basis. As a minimum, daily CQC testing on the produced mix shall include: Sieve Analysis TEX-200-F, Asphalt Content TEX-210-F, Hveem Stability TEX-208-F, Laboratory Compacted Density TEX-207-F, and Maximum Specific Gravity TEX-227-F. The number and location of all HMAC tests shall be determined by the County Engineer with a minimum of three, 6-inch diameter field cores secured and tested by the contractor from each day's paving. Each HMAC course shall be tested for in-place density, bituminous content and aggregate gradation, and shall be measured for compacted thickness. The number and location of all HMAC test samples shall be determined by the County Engineer.

#### **B8. CONCRETE PAVEMENT**

B8.1. Roads requiring a portland cement concrete pavement may be used. In such cases, the pavement thickness shall be a JRCP Jointed Reinforced Concrete Pavement in accordance with the detail included in Appendix J. The mix shall be from a TxDOT certified plant. The mix design shall be submitted to the County Engineer for approval prior to placement of the material.

#### **B9. CONCRETE - GENERAL**

- B9.1. Unless otherwise specified, concrete shall be in accordance with Item 421 of the current edition of the TxDOT Standard Specifications for Construction and be placed in accordance with the applicable item.
- B9.2. All concrete shall be tested for compressive strength. One set of three concrete test cylinders shall be molded for every 50 cubic yards of concrete placed for each class of concrete per day, or at any other interval as determined by the County Engineer. A slump test shall be required with each set of test cylinders. One cylinder shall be tested for compressive strength at an age of seven days and the remaining two cylinders shall be tested at 28 days of age.

#### **B10. ROAD NAMES, SIGNS, AND MARKERS**

- B10.1. All roads shall be named, with prior approval for said name from the Chambers County 911 Addressing Coordinator. Roads must be named in a manner to avoid confusion in identification. Roads that are extensions of existing roads must carry the names of those in existence. Roads that are not continuous, or which have 90 degree turns, shall have different names. The Owner shall provide the Coordinator with two digital files of the plat. One file shall be in an Adobe .pdf format, and the other file shall be in an AutoCAD .dwg format georeferenced to NAD 1983 State Plane Grid Coordinate System, Texas Central Zone (4203), with drawing units of US feet. The road names shall be displayed on standard intersection road marker signs erected by the Owner in compliance with the TxMUTCD "Street Name Signs" and at the locations as indicated on the construction plans.
- B10.2. Traffic control signs (such as stop, yield, and speed limit signs) shall be installed by the Owner of said subdivision in compliance with the TxMUTCD and at the locations as indicated on the approved construction plans. Other traffic control signs, as shown on the construction plans, shall be installed to indicate any unusual traffic or road hazard or conditions that may exist. All traffic control devices shall

be placed in compliance with the TxMUTCD and the construction cost shall be borne by the Owner.

- B10.3. A speed limit of 25 mph for local roads, 35 mph for collector roads and 45 mph for arterial roads within all platted subdivisions is hereby adopted. This limit may be changed only by Commissioner's Court upon the basis of an engineering and traffic investigation showing that the prima facie maximum reasonable and prudent speed for a particular road (or part of a road) should be different. The placement of a stop sign or a yield sign on the minor road at intersections shall be evaluated on a case-by-case basis in accordance with the TxMUTCD.
- B10.4. For any road that is proposed to be extended at some time in the future, a minimum of five metal channel posts, equally spaced, shall be placed at the end of the road. Each post shall have an 18"x18" red diamond object marker sign (type OM-4 per TxMUTCD) placed four feet above the existing ground.
- B10.5. A future road extension sign shall be placed at the end of all roads and temporary cul-de-sacs that are proposed to be extended at some time in the future. The sign shall state the following: Future Extension of <name of road>.
- B10.6. Signage that differs from the standard signage that is maintained by the County shall be maintained by the Owner. The signage shall be maintained in such a fashion to comply with the TxMUTCD requirements.

#### **B11. DRAINAGE AND FLOOD CONTROL**

#### A. General

- 1. All drainage plans and construction shall must meet or exceed the requirements of Chambers County, Trinity Bay Conservation District, Trinity River Authority and U.S. Army Corps of Engineers when proposed outfall occurs within their jurisdiction.
- 2. Public storm sewers are defined as sewers and appurtenances that provide drainage for a public right-of-way or more than one private tract, and are located in public right-of-way or easement. Private storm sewers provide internal drainage for a reserve or other tract. Private storm sewer connections to public storm sewers shall occur at a manhole or at the back of inlet as approved by the County Engineer or TBCD. All construction and design shall conform to the Standard Details.
- 3. All storm sewers shall meet or exceed the requirements of the "Drainage

- Criteria Manual for Chambers County, Texas" and the requirements of the Water Service Provider, as applicable.
- 4. All storm water systems shall be designed, and be equipped with appropriate treatment facilities, to meet the Chambers County Texas Pollution Discharge Elimination System, Phase II Standards (CCTPDES).

#### **B.** Storm Sewer Materials

- 1. Reinforced Concrete pipe from an approved vendor is required for any future system to be maintained by the County.
- 2. Storm sewer outfalls shall have slope protection to prevent erosion. Slope protection may be constructed of slope paving or rip-rap. Slope paving shall be four-inch (4"), five (5) sack concrete with # 3 steel rebar on twenty four inch (24") centers, each way. Rip-rap shall be a minimum of six-inch (6") broken concrete rubble with no exposed steel or well-rounded stone and shall be a minimum of eighteen inches (18") thick. Slope protection texturing shall be required where public access is likely. Refer to the Standard Details for minimum dimensions. In areas where public access is available such as trails, bikeways and green belts slope paving and rip-rap shall be architecturally designed to complement the natural features of the drainage way. The Chambers County Engineer shall approve all outfall design features prior to installation in drainage facilities, bayous or wetland areas. Adequate safety features shall be installed to prevent and deter children and animals from entering outfalls.
- 3. Alternate materials may be used with specific approval from the County Engineer or Water Service Provider, as applicable.

#### C. Storm Sewer Location

- 1. Public storm sewers shall be located within a public street right-of-way or a storm sewer easement, dedicated to the public and adjoining a public street right-of -way.
- 2. Recommended alignment with a public street right-of-way:
  - a. Storm sewers in the boulevard pavement sections shall be aligned with the median along the centerline of the right-of-way.
  - b. Storm sewers in undivided pavement sections shall be located five feet (5') inside the right-of-way. For all storm sewer located in a public street right-of-way, a minimum distance of two feet (2') shall be maintained inside the right-of-way line to the outside edge of the storm sewer unless otherwise accompanied by an adjacent easement.

- c. Alternate locations for a storm sewer may be permitted by the County Engineer when good cause is shown.
- 3. Recommended alignment within an exclusive storm sewer easement:
  - a. Storm sewers within easements shall be placed no closer than five feet (5') measured from the outside edge of the pipe to the edge of an easement, except when adjoining another easement or public right-ofway where the distance may be reduced to two feet (2'). The storm sewer shall be placed in the center of the easement. When the storm sewer easement adjoins a public right-of-way, the easement maybe reduced to a minimum of ten feet (10') and the storm sewer may be aligned closer to the right-of-way line, as long as required clearances are met, with specific approval of the County Engineer.

#### D. Construction Plan Requirements

- 1. A Drainage Area Map shall be included in the construction plans. The drainage area map shall include:
  - a. Drainage areas, including areas draining from off-site onto or adjoining the project.
  - b. Design storm runoff.
  - c. 100 & 500 Year storm runoff.
  - d. Route of overland flow including the overflow to a drainage way sized to accommodate the 100-year flow.
  - e. Elevations for the 25-year, 100-year and 500-year.
  - f. Flow per inlet.
  - g. Maximum 100-year and 500- year ponding elevation.
  - h. Lot grading with flow along side lot lines from back to front of property lines.
  - i. Detailed drainage calculations shall be submitted with the construction plans.
  - j. The hydraulic gradient for the design storm shall be shown on the construction drawings. Calculations for the elevation of the hydraulic gradient shall be provided with the design storm drainage calculations.

k. TPDES techniques and facilities shall be noted on the plans sufficiently to establish that pollution discharges will be prevented, as much as is practical.

#### E. Design Requirements

- 1. Minimum depth of a storm sewer (measured to the top of pipe) shall be eighteen inches (18") below top of curb or finished grade, whichever is lower. Minimum size storm sewer for main and inlet lead shall be eighteen inches (18").
- 2. Storm sewers shall be bedded using cement stabilized sand in accordance with the Standard Details.

#### 3. Pipe Requirements

a. Reinforced concrete pipe shall meet or exceed the following minimum requirements listed in Table 6:

TABLE 6				
Pipe Class	Maximum Cover (Ft)			
III	15'			
IV	30'			

- b. Reinforced concrete pipe installed at a depth greater than thirty feet (30') shall be designed by the design engineer for the specific installation and approved by the County Engineer. Reinforced concrete pipe shall be designed in accordance with the American Concrete Pipe Association, "Concrete Pipe Design Manual". Maximum cover on the pipe shall be to the ultimate finished grade or natural ground, whichever is greater.
- c. Storm sewers shall have a minimum clearance of six inches (6") from all other utilities. The clearance shall be measured from the outside wall of the pipe. Design storm runoff shall be calculated in accordance in accordance with the "Drainage Criteria Manual for Chambers County, Texas".
- d. Storm sewers less than forty-two inches (42") in diameter shall be constructed on a straight horizontal and vertical alignment between manholes. Storm sewers greater than or equal to forty-two inches (42") in diameter may be laid along a curve using manufactured bends of less than or equal to 11-1/4". Camera inspection may be required on storm sewers constructed along a curve.

#### F. Hydraulic Requirements

See Chambers County Drainage Criteria Manual.

#### G. Appurtenances

#### 1. Manholes

- a. Manholes shall be placed at all changes in vertical alignment (except sewers laid along a curve); at a change of size of storm sewers; at the intersection of two or more storm sewers; at all inlet leads; and at the end of all storm sewers.
- b. Maximum spacing between manholes shall be five hundred feet (500')
- c. Manhole covers shall be cast iron, traffic bearing, type ring and cover with the words "Storm Sewer" cast into the cover. See Standard Details.

#### 2. Inlets

- a. Curb inlets shall be spaced and sized to intercept the calculated runoff for the design storm. The water surface elevation at the inlet shall be less than or equal to the top curb for the design storm flow.
- b. Maximum travel distance of water in the street to a curb inlet shall be three hundred feet (300') on a major thoroughfare and in a commercial area. The maximum travel distance of water in the street permitted in a single-family residential area shall be five hundred feet (500').
- c. Curb inlets should be located on the intersecting side street at an intersection with major thoroughfare. Locations on the major thoroughfare at intersections shall be specifically approved by the County Engineer.
- d. Grated inlets will not be permitted in an open ditch.
- e. Backslope swale interceptors shall be placed in accordance with the requirements of the County Engineer when permitted.
- f. Curb inlets shall have grate inlet lids (see Standard Details).
- g. Backfill around inlets with 1.5 sacks per cubic yard of cement stabilized and to top of first stage inlet.

- B11.1 Storm water management controls, when needed, shall be designed, constructed and maintained to restrict the rate of drainage from the platted area to the rate of drainage of the land in its natural state. When a development shall have several sections, storm water management controls for the ultimate developed area shall be constructed if not located in the first platted section. Storm water management controls are to be designed by a Registered Professional Engineer using a basis of a 2, 10, and 100-year storm. Exceptions may be allowed when the Owner can demonstrate that downstream property shall not be adversely affected.
- B11.2 Drainage calculations shall be made using the edition of the Chambers County Drainage Criteria Manual in effect as of the date of these Regulations or other methods satisfactory to the County Engineer. All data and calculations must be presented to the County Engineer as part of the construction plans. The following requirements shall be incorporated into the design:
- B11.2.1 Bridges and cross drainage structures for arterial and collector roads shall be designed to convey the 25-year storm without overtopping the facility.
- B11.2.2 Bridges and cross drainage structures for local roads shall be designed to convey the 10-year storm without overtopping the facility.
- B11.2.3 All longitudinal drainage structures shall be designed to convey the 10-year storm.
- B11.2.4 On curb and gutter roadways, the roadway shall be designed so that no more than one half of one travel lane shall be inundated by the 10 year storm.
- B11.3 All drainage structures and appurtenances shall be designed by a Registered Professional Engineer. A profile shall be shown in the construction plans for all drainage structures. Each profile shall show the design flow, velocity, invert elevations, and the hydraulic grade line.
- B11.4 Driveway culverts shall have a minimum interior diameter of 24" or equal and a minimum length of 22 feet, and shall include a concrete apron safety treatment in accordance standards. All driveway culverts shall have safety end treatments with concrete aprons.
- B11.5 Maintenance responsibility for drainage will not to be accepted by the County other than that accepted in connection with draining or protecting the road system. Maintenance responsibility for storm water management controls will

remain with the Owner.

B11.6 Drainage Reserves shall be provided for all drainage courses in and across property to be platted. The location and width shall be shown on the plat and marked "Drainage Reserve" In general, a "Drainage Reserve" shall be a minimum of 30 feet in width. All named channels shall have a drainage reserve dedicated that is 60 FT either side of the centerline of the channel. Any existing unnamed channels shall have a minimum drainage reserve dedicated that is 30 Ft wide. Storm sewer outside of roadway right of way can be in a 20 FT minimum easement or reserve.

B11.7 All roadside ditches shall have a minimum depth of 3 FT, as measured from the edge of the road pavement, equal to the diameter of the driveway culvert pipe(s) plus nine inches, and a bottom width equal to the diameter of the driveway culvert pipe(s). The side slopes of the ditches are to be 3.5:1 on front slope and 3:1 for back slope or flatter.

B11.8 All detention, or retention ponds shall have a minimum 15 FT wide access berm around the perimeter. The side slopes for the area shall be a 3.5:1 or flatter. If articulating concrete blocks are used, then the side slope can be steeper and the access berm eliminated.

B11.9 All detention ponds shall have a 6 FT walking path surrounding pond.

B11.10 All detention ponds shall incorporate a retention pond that maintains a water depth of a minimum of 6 FT with aeration or paved bottom as part of design to reduce maintenance.

B11.11 All ponds shall include a required DECLARATION OF MAINTENANCE COVENANT FOR STORMWATER STRUCTURAL CONTROLS

### DECLARATION OF MAINTENANCE COVENANT FOR STORMWATER STRUCTURAL CONTROLS

This	Declaration	of	Maintenance	Covenant	tor	Storm	ıwater	Stru	ctural	Control(s)
("Declaration	") execute	d	on			,	is	by	and	between
("Declarant") and Chambers County ("County").										

WHEREAS, Declarant is the owner of the real property described on Exhibit A attached hereto and incorporated by reference (the "Property"); and

WHEREAS, Declarant intends to construct and thereafter maintain stormwater structural controls (the "Controls") on the Property including, but not limited to, conduits, inlets, channels, pipes, retention or detention ponds and other devices and measures, necessary to collect, convey, store and control stormwater runoff, to be used for conveying stormwater from the Property to the County's municipal separate storm sewer system (MS4).

WHEREAS, to ensure that the Controls continue to function according to the design and performance standards to which they were constructed, Declarant is imposing upon the Property, as a covenant running with the land, the obligation to maintain the Controls until such time, if ever, as the obligation to maintain the Controls is properly terminated;

NOW, THEREFORE, in consideration of the foregoing premises, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Declarant declares as follows:

- Covenant Running with the Land. Declarant covenants that the burdens and benefits
  made and undertaken under this Declaration constitute covenants running with the
  Property, binding all successors and assigns.
- 2. Declarant's Responsibility to Construct and Maintain. Declarant shall be responsible for the construction of the Controls. Declarant, its successors and assigns will at all times be responsible for the maintenance, repair and inspection of the Controls. The Controls are to be constructed in accordance with all applicable laws, ordinances, regulations, rules, and directives of appropriate governmental authorities.
- **3.** Location of the Controls. The Controls shall be located on, over, across or under the Declarant's Property.
- 4. Chambers County. The County, or its designee, is authorized to access the Property as necessary to conduct inspections of the Controls to ascertain compliance with this Declaration and the County's stormwater management program requirements ("County Requirements") and if necessary or desirable, to maintain the Controls as provided under Paragraph 6 below. The County is relieved of all responsibility for the maintenance of the Controls for the term of this Declaration. In no event shall this Declaration be construed to impose any such obligation on the County.

- 5. Maintenance of Controls. The Declarant shall be entirely responsible for all maintenance activities associated with the Controls. The Declarant shall implement appropriate maintenance activities immediately if any of the following instances occur: obstructions of inlets/outlets, mechanical failures (valves, pumps, gates, etc.), accumulation of trash, erosion or instability of slopes, accumulated sedimentation of 25% or more of the original design capacity, excessive growth of vegetation/trees, and/or if written notice from the County is issued requesting maintenance on the Control. The Declarant shall retain documentation of all maintenance activities performed on the Control and make the records available to the County for review upon request.
- 6. Failure to Maintain. If Declarant or its successors or assigns fails to maintain the Controls as required by this Declaration after 30 days written notice thereof, the County, may, but is not obligated to, cause any and all maintenance to be taken and performed and otherwise to take whatever steps the County deems necessary to maintain the Controls at the Declarant's expense. Declarant shall reimburse the County within 10 days from receipt of written demand from the County all costs incurred by the County together with interest thereon from the date incurred by the County at the lesser of (i) the maximum lawful rate of interest or (ii) 15% per annum until paid in full. Nothing in this paragraph or this Declaration, shall create or impose any liability on the County, its agents, employees, successors or assigns, for damages alleged to result from or to be caused by stormwater drainage from the Property.
- 7. Conflicts. The County Requirements control over any inconsistent provisions of this Declaration. As applicable provisions of the County Requirements are amended, modified, revised, deleted or moved to different sections, this Declaration is deemed to be revised so as to conform to the provisions of the County Requirements as they may exist from time to time and are applicable to the Property or any part thereof.
- 8. Successors and Assigns Bound. Declarant hereby agrees and acknowledges that maintenance of the Controls as set forth herein, the cost of maintenance, the County's access to the Controls, the County's rights of ingress and egress to the Controls and the County's right to recover all costs if Declarant fails to maintain the Controls are a burden and restriction on the use of the Property and the provisions of this Declaration shall be binding upon the Declarant, its successors and assigns and upon any future owners of the Property.

Every person who now or hereafter owns or acquires any right, title or interest in or to any portion of the Property is and shall be conclusively deemed to have consented and agreed to every covenant contained in this Declaration, whether or not any reference to this Declaration is contained in the instrument by which the Property was conveyed to such person. Whenever in this Declaration a reference is made to a party, such reference is deemed to include a reference to the heirs, executors, legal representatives, successors and assigns of such party.

9. Negation of Partnership. None of the terms or provisions of this Declaration shall be deemed to create a partnership between or among Declarant and the County or any owners, mortgagees, occupants or otherwise; nor shall it cause them to be considered joint venturers or members of any joint enterprise. This Declaration is not intended nor

- shall it be construed to create any third party beneficiary rights in any person, except as expressly stated herein.
- 10. Enforcement. If any person, persons, corporation or entity of any other type shall violate or attempt to violate this Declaration, it shall be lawful for the County or its successors to prosecute proceedings at law, or in equity, against the person or entity violating or attempting to violate this Declaration and to prevent the person or entity from violating or attempting to violate the Declaration. The failure at any time to enforce this Declaration by the County or its successors whether any violations hereof are known or not, shall not constitute a waiver or estoppel of the right to do so in the future.
- 11. Entire Agreement. This Declaration contains all the representations and the entire agreement of Declarant with respect to the subject matter. Any prior correspondence, memoranda or agreements or superseded by this Declaration. The provisions of this Declaration shall be construed as a whole according to their common meaning and not strictly for or against Declarant.
- 12. Notices. All notices and approvals required or permitted under this Declaration shall be served by certified mail, return receipt requested, to a party at its last known address or its principal place of business. Date of service of notice shall be the date on which such notice is deposited in a post office of the United States Postal Service or successor governmental agency.
- **13. Governing Law; Performance.** This Declaration and its validity, enforcement and interpretation shall be governed by the laws of the State of Texas without regard to any conflict of laws principles and applicable federal law. This Declaration is performable only in Chambers County, Texas.
- **14. Amendment.** This Declaration may not be amended or abrogated in part or whole, without the express written consent of the County.
- **15. Rights of Mortgagees, Trustees or Lienholders.** No violation of any of these restrictions, covenants or conditions shall affect or impair the rights of any mortgagee, trustee or lienholder under any mortgage or deed of trust, or the rights of any assignee of any mortgagee, trustee or lienholder under any such mortgage or deed of trust.
- 16. Gender and Grammar. The singular wherever used herein shall be construed to mean or include the plural when applicable, and the necessary grammatical changes required to make the provisions hereof apply either to corporations or other entities or individuals, male or female, shall in all cases be assumed as though in each case fully expressed.
- **17. Titles.** The titles of sections contained herein are included for convenience only and shall not be used to construe, interpret or limit the meaning of the term or provision contained in this Declaration.
- **18. Recording of Agreement.** This Declaration shall be recorded in the Official Public Records of Chambers County, Texas and shall constitute notice to all successors and assigns of the title to the Property of the rights and obligations contained herein.

I.	Ny commission expires:

#### **Detention Pond Maintenance Plan**

#### Year 1

- 1) Detention Basin should be monitored monthly to ensure that sufficient vegetation has been established. Eliminate invasive plants at the soonest possible time. Hand weeding and pruning is the preferred method for removing invasive plants, however spot applications of appropriate herbicides may be utilized. Determination of herbicide use and application should only be completed by certified applicators and all manufacturer's recommendations must be followed.
- 2) Monitor the basin following rain events to ensure that it drains completely within a 72-hour period, or per the design specifications. If the basin does not drain as designed, identify the cause. Corrective measures may be necessary to mitigate drainage issues.
- 3) Mowing should be conducted on a routine basis to control the growth of invasive species. During the first year, vegetation should be mowed no shorter than 6" and mowing activities should be conducted prior to the maturation of invasive species into seed form. Mowing activities should not be conducted during wet conditions.
- 4) Inspect inlet and outlet structures on a monthly basis to ensure proper function.

#### Year 2 and Beyond

- 1) Mowing should be conducted on a routine basis to control the growth of invasive species. Vegetation should be mowed no shorter than 4" and mowing activities should be conducted prior to the maturation of invasive species into seed form. Mowing activities should not be conducted during wet conditions.
- 2) Monitor the basin on a routine basis for overall performance. If basin does not drain within a 72-hour period or per the design specifications, identify the cause. Consult with the design engineer if necessary to perform corrective actions.
- 3) Conduct annual inspection of basin to identify erosion/instability issues, evidence of animal burrowing, excessive vegetation growth, accumulations of trash/debris, drainage issues, mechanical failures, and excessive accumulations of sediment. Complete maintenance inspection checklist and retain on file (see attachment).
- 4) Perform any necessary maintenance activities to ensure that the basin continues to function according to the original design specifications.

## Detention Pond Maintenance Inspection Checklist

Pond:	Date:Inspected b	oy:Location:
General Observations: Is water flowing?  Yes No	Standing water? Yes	No Depth:Comments:
Any obstructions or sediment accumul	•	•
Pond Conditions:	5% or more of total designed capac ow signs of settling, cracking	city requires maintenance) g, sloughing or other problems? Yes No
Do the embankments, emergency spill	way (if applicable), or side sl	slopes show any erosion or instability? Yes No _
Is there any evidence of animal burrow	ing or other activity that coul	ıld contribute to instability or increased erosion? ☐ Yes No Is there
evidence of encroachment into the por	nd or improper use of the por	nd? Yes No
Do vegetated areas need mowing?  Mowed today Will s		nere areas that need to be re-vegetated Yes No Will schedule re-vegetation activities
Do vegetated areas need thinning, i.e.	cattails, willows, trees?	Yes No Thinned today Will schedule
thinning Is there accumulation of trash	, debris and/or litter to be ref	moved? ☐ Yes No ☐ Removed today
	,	Will schedule removal
Any signs of vandalism or other activity	y that could affect performan	nce of the pond?  Yes  No
If permanent pool, any visible pollution	? Yes No	Erosion at high water mark? Yes No
Abnormally high water level? (May indicate obstruction at orifice, or trash rack; veri	Yes No ify outlet structure operating properly)	Unusual Algae blooms? Yes No (May signal too many nutrients in runoff; identify dog activity and clippings management; will need monitoring)
Structural Components: Are the pipes/inlets going into or out of	f the pond clogged or obstruc	cted? Yes No Is the outfall channel from the pond functioning
appropriately?		Yes No
Is the inflow trickle channel working pro	operly? Yes No _	
Is the orifice and/or trash rack obstruct	ed? Yes No	
Is the outfall channel, trickle channel o	r other conveyance in need	of repair? Yes No
Are the manholes, frames, and covers	associated with the outfall c	channel in appropriate condition? Yes No
Do any safety features, such as fences	s, gates or locks need repair	r or replacement?  Yes  No

#### Plan of Action:

If answered YES to any of the above, the following is an anticipated Maintenance Needs Action List:

**Total number of concerns:** 

Need more monitoring (Anticipated schedule to re-visit; identify what will trigger action) (Yes answers)

Need routine repair (Approximate schedule for repairs; date of follow-up to re-inspect)

Need immediate repair (Take action if correct equipment on site; or contact supervisor)

## Appendix C:PLAT NOTES and CERTIFICATION LANGUAGE

#### C1. OWNER DEDICATION

STATE OF TEXAS §

COUNTY OF CHAMBERS §

(Separate statements may be made for each owner, or a joint statement made for all owners.)

I (or We), (name of owner or owners, or in the case of corporations, name of President and Secretary, together with the words "President" and "Secretary" respectively of name of corporation) owner (or owners) of the property subdivided in the above and foregoing map of the (Name of Subdivision), do hereby make subdivision of said property (in case of corporation use words "for and on behalf of said name of company") according to the lines, streets, alleys, parks, reserves and easements shown herein, and designate said subdivision as (name of subdivision) in the (name of Head right Survey), Abstract (number), an addition in Chambers County Texas; and (in case of corporation use words "for and on behalf of said name of company" )do dedicate to public use, the streets, alleys, parks, reserves and easements shown thereon forever except where noted on the map for private streets; and do hereby waive any claims for damages occasioned by the establishing of grades as approved for the streets and alleys dedicated, or occasioned by the alteration of the surface of any portion of the streets or alleys to conform to such grades; and do hereby bind myself (or ourselves), my (or our) successors and assigns to warrant and forever defend the title of the land so dedicated.

(to be added if overhead utilities are used for service to the subdivision):

There is also dedicated for utilities an unobstructed aerial easement five feet wide from a plane 20 feet above the ground upward located adjacent to each side of all utility easements shown hereon.

I (or We) do hereby dedicate forever to the public all drainage easements indicated on this map for drainage purposes, giving the County, Trinity Bay Conservation District (as applicable), or any public agency the right to enter upon said easements at any and all times for any public purpose.

Further, I (or We) hereby relinquish all rights of access to major streets or thoroughfares shown hereon except by way of the platted streets shown.

I (or We) certify that the plat of this subdivision complies with all the applicable Ordinances, Laws, and Statutes of Chambers County, the State of Texas and the United States of America as they may apply to this property.

#### C2. NOTARY ACKNOWLEDGEMENT

Notary Acknowledgment. (May use separate acknowledgement for each owner or joint acknowledgement as applicable)

#### **ENVIRONMENTAL HEALTH NOTES**

NOTE: (When Individual Water Wells and On-Site Sewer Facilities Are Utilized): IT IS HEREBY ACKNOWLEDGED that neither waste water treatment facilities or potable water will be provided to any lots in the subdivision platted hereon. Let it be known that each individual property owner shall be solely responsible for these services with the following restrictions:

To minimize the possibility of the transmission of waterborne diseases due to the pollution of the water supplied for domestic use, each lot in the platted subdivision shall have a site-specific design by a registered professional engineer or a registered sanitarian and approved by the local jurisdictional authority. In no instance shall the area available for such systems be less than two times the design area.

The Owner, Purchaser and Successors in interest to the land shown on this plat are served by on-site Sewage facilities. The owners agree and covenant that they will connect to public sewers at such as sewer service becomes available to any boundary line of the lots shown hereon. This covenant shall be enforceable of said lots by Chambers County and shall run with the land.

NOTE: The top of all water wells and all mechanical parts associated with the onsite sewer facilities shall be a minimum of 12-inches above the Base Flood Elevation.

#### Environmental Health Certification

<ol> <li>(name of Environmental Health Officer),</li> </ol>	<u>,</u> Environme	ntal Health Off	ticer for (	Chambers
County Texas, do hereby certify that	t the plat of t	his subdivisior	n complie	s with the

#### C12.TRINITY BAY CONSERVATION DISTRICT

(If subdivision lies within the jurisdiction of the Trinity Bay Conservation District this certification is required.)

Trinity Bay Conservation District Certification

 (name of District Official), do hereby certify that the plat of this subdivision complies with the Regulations of the Trinity Bay Conservation District and Design Standards applicable thereto.

Date

/s/ \_
Signature Of Certifying Official

#### NOTE:

Printed Name and Title

"Any structure placed within a Trinity Bay Conservation District easement must be designed and constructed in accordance with all federal, state, and local regulations, and must have all appropriate permits in place prior to commencement of construction. These permits must include, but are not limited to, U.S. Army Corps of Engineers Section 404 and Section 10 permits. Design of said structure shall be reviewed, and approved by the Trinity Bay Conservation District prior to construction in attempt to reduce the potential for negative impacts to the regional drainage system."

Appendix E: LOT REQUIREMENTS

#### **E1. LOT DIMENSIONS**

Lots with Curb and Gutter Streets shall be a minimum of 55 feet in width as measured at the front property line. Lots with open ditch streets shall be a minimum of 100 feet in width as measured at the front property line.

For determining the area required for an on-site sewage facility, the minimum lot size shall be in accordance with the current regulations of the Chambers County and Cities Health District, or with the requirements of any other agency responsible for issuing permits for on-site sewage disposal as may be designated by the Chambers County Commissioner's Court. Drainage reserves, easements, beds and banks of wet weather creeks, bodies of water, and road widening easements shall not be included when calculating the lot area.

#### **E2. SET BACK REQUIREMENTS**

The building setback line on all TxDOT highways and major County roads shall be 50 feet from the edge of the right- of-way.

The building setback line on all public roads other than major highways and roads shall be 25 feet from the edge of the right-of-way.

The following roads are designated as major highways and roads. The Commissioner's Court may specify additional roadways upon recommendation by the County Engineer:

- All state and federal system roadways
- All County thoroughfares

If the building set back lines as stated above conflict with the setback requirements adopted by a municipality, the municipal requirements shall prevail if they are in the ETJ of the municipality.

TBD – SHALL BE DETERMINED THROUGH ENGINEER STUDY

## **APPENDIX G: INTERSECTION APPROACH DETAIL**

## APPENDIX H; COUNTY CLERK'S RECORDING CHECKLIST

It shall be the responsibility of the Owner to record a plat with the Chambers County Clerk. A plat will not be recorded until all of the following requirements have been met:

- L.1 **Previous approval of the subdivision plat.** All plats must have been approved by a municipal planning / development department or the County Commissioners' Court prior to recording by the County Clerk's Recording Office.
  - L.1.1 If the subdivision is located **within the city limits** of a municipality the plat must have been approved by the municipality and must have been signed by the appropriate official(s). Contact the municipal planning department for information.
  - L.1.2 If the subdivision is located within the extra-territorial jurisdiction (ETJ) of a municipality the plat must have been approved by the municipality or the County Commissioners' Court and must have been signed off by the appropriate official(s). Contact the municipal planning department or the County Engineer's office at (512) 943-3330 for information.
  - L.1.3 If the subdivision is **not located within the city limits or the ETJ** of a municipality the plat must have been approved by the County Commissioners' Court and must have been signed by the appropriate official(s). *Contact the County Engineer's office at (512) 943- 3330 for information*.
- L.2 **County Clerk requirements for recording subdivision plats**. These items can be delivered to the Recording Office in person, by courier, by mail or electronically.
  - L.2.1 **Copy of the subdivision plat**. At least one copy of the subdivision plat, including all signatures and seals except those for the County Judge and a Deputy County Clerk. **Digital copies of plats** can be submitted via the Chambers County Website. Digitized plats must be in Group IV TIF format, with resolution of 400 dots per inch and should have been made from 18" x 24" originals.
  - L.2.2 **Affidavit(s) for Recordation**. An original, signed and notarized affidavit is required from each entity owning property included in the subdivision. Digital copies are not being accepted at this time but paper copies may be delivered in person or by mail. See Appendix M.
- L.3 Chambers County Tax Certificate(s). Texas State law requires submittal of an original tax certificate for each tract or parcel included in the subdivision, so at least one Chambers County Tax Certificate is required for every subdivision plat, showing that the taxes are currently in good standing (Property Code, Section 12.002 (e)).
  - L.3.1 Tax certificates are required even for non-taxable entities such as churches and government agencies.

- L.3.2 The Recording Office will accept digitized copies of tax certificates but only if submitted by the tax office. *Contact the Chambers County Tax Assessor Collector's office*
- L.4 **County Plat Recording Fees**. Recording fees total \$91.00 for the first sheet in a subdivision plat. Additional sheets in the plat, if any, are charged at \$75.00 per sheet.

	1 sheet	2	3	4	5	6	7
		sheets	sheets	sheets	sheets	sheets	sheets
1 сору	\$91.00	\$166.00	\$241.00	\$316.00	\$391.00	\$466.00	\$541.00
2 copies	same	same	Same	Same	same	same	same

- L.4.1 The Recording Office will record and process up to 2 copies of a plat for the fees noted above.
- L.4.2 These fees apply to digital plat images as well as to hard copies.
- L.5 **Plat Cover Sheet**. The submitter should fill in the name of the subdivision and the contact information, leaving all other portions blank.
- L.6 **Items Returned to the Plat Submitter**. The plat submitter will receive all recorded copies of the plat, a copy of the Plat Map Recording Sheet, a receipt for recording fees, and, if requested, a copy of the Plat Cover Sheet. Tax Certificates and affidavits will be kept by the County.
- L.7 **Plat Cover Sheet**. The submitter shall fill in the name of the subdivision and the contact information, leaving all other portions blank. See Appendix O.
- L.8 **Font Size.** All text on subdivision plats shall have a font size of 10 points or greater.

## **APPENDIX J: FEE SUMMARY**

Preliminary Plat Review	\$400 + \$10/lot		
Final Plat Review	\$500		
Construction Plan Review	\$400 + \$10/lot		
Other Fees:			
Public Notice	\$100 + actual cost		
Replat / Amendment of Final Plat	\$500		
Variances	\$250/type		
Extension of Preliminary Plat*	No fee*		
Vacation of R.O.W or Easement	\$100		
Construction Inspection	2% of construction cost**		
Drainage Analysis Fee	\$1000		
Additional Drainage review expense	Charged as invoiced		

<sup>\*</sup>No fee for a preliminary plat extension with no modifications. If there are modifications, the fee will be \$30/lot for only those lots being modified.

<sup>\*\*</sup>Based on the cost of soil erosion and sedimentation controls, and roadway and drainage construction
